

innovative

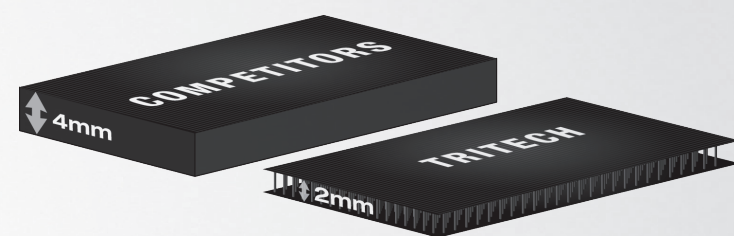

TriTech™

A significant leap in innovation, our revolutionary TriTech material has radically altered the definition of high performance fabrics.

We've combined our newest material with the comfort and durability you have come to expect from Bledsoe. Our new line of Crossover Braces with TriTech material doesn't just look different, it really is.

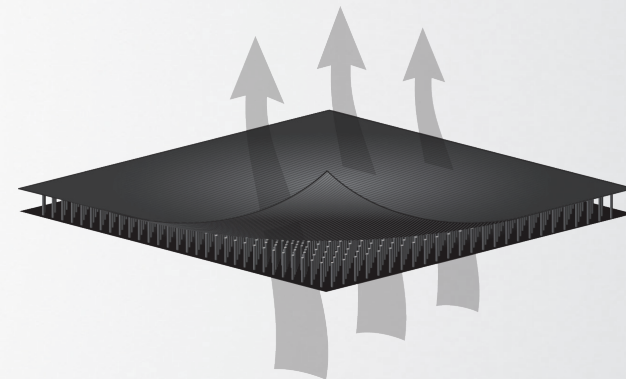

1 Lower profile. Thinner is better.

TriTech is half as thick as the competition. (Bledsoe® TriTech™: 2mm, DonJoy® Drytex™: 4mm, Breg™ AirMesh™: 4.25mm)

2 Breathable. Cooler.

TriTech keeps you cooler when breaking a sweat. It is 'soe' breathable you can see through it!

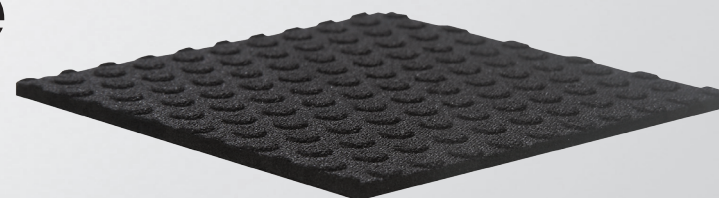

3 Better compression. Better support.

Increased spandex provides more compression and support, while preventing brace migration.

3D Neoprene

New neoprene material provides warmth to the joint and maximum compression support.

Crossover

Designed for high performance, the Crossover braces provide medial and lateral stability. Heavy-duty sport hinges adjust for range-of-motion in 10° increments with flexion and extension stops provided.

- » Removable and adjustable patellar buttress can be positioned and trimmed for multiple applications
- » Pull tabs ease brace application
- » Mesh popliteal for patient comfort

PULL-ON DESIGN - Our classic pull-on design offers the most uniform fit.

FC DESIGN - Front closure wraparound design allows for ease of application without removing shoes. Also ideal for patients with limited flexibility and reach.

FT DESIGN - Hybrid design with a pull-on calf and front closure thigh allows for adjustable fit for patients with atypical legs.

AVAILABLE:
Custom or Off-the-Shelf
TriTech or 3D Neoprene materials
Standard 15.5" (39 cm) length for maximum control or short 13.5" (34 cm) length
Standard post-operative hinge available on standard length FC design

INDICATIONS

- » For mild and moderate ACL, PCL, MCL and LCL sprains, menisci and patellar retinaculum injuries, mild instabilities, and mild osteoarthritis
- » Crossover ROM indicated for application to knees for locked or limited motion control during rehabilitation after operative procedures or injury

Hinged Knee

Ideal for moderate levels of activity, the Hinged Knee braces provide mild MCL and LCL support in a low-profile design.

- » Polycentric hinges can be removed for laundering
- » Removable and adjustable patellar buttress can be positioned and trimmed for multiple applications
- » Mesh popliteal for patient comfort
- » Extension stops available upon request

PULL-ON DESIGN - Our classic pull-on design offers the most uniform fit.

FC DESIGN - Front closure wraparound design allows for ease of application without removing shoes. Also ideal for patients with limited flexibility and reach.

FT DESIGN - Hybrid design with a pull-on calf and front closure thigh allows for adjustable fit for patients with atypical legs.

AVAILABLE:
Off-the-Shelf
TriTech or 3D Neoprene materials

INDICATIONS

- » For strained or sprained knee ligaments and mild MCL and LCL support

Padded Knee Support

- » Patella cutout
- » Anterior pad provides additional warmth and compression
- » Mesh popliteal for patient comfort

AVAILABLE:
TriTech or 3D Neoprene materials

Patella Donut

- » Sewn-in tubular donut buttress
- » Anterior pad provides additional warmth and compression
- » Mesh popliteal for patient comfort

AVAILABLE:
TriTech or 3D Neoprene materials

Adjustable Horseshoe

- » Adjustable horseshoe buttress can be positioned and trimmed for multiple applications
- » Anterior pad provides additional warmth and compression
- » Mesh popliteal for patient comfort

AVAILABLE:
TriTech or 3D Neoprene materials

Knee Support

- » Low profile 13" (33 cm) sleeve
- » 3D Neoprene material for support, compression and warmth

AVAILABLE:
3D Neoprene material only
