

Kinesis Low-Force Keypad

For Mac & PC

PC version - black

PC version - beige

Mac version - white

Great for number crunchers...

The Kinesis low-force keypad includes a 2-port USB hub and utilizes low-force, tactile mechanical key switches adding to both comfort and operating life.

The low-force keypad allows users flexibility in positioning the keypad to the right or left of the keyboard. It's perfect for narrow keyboards like the Kinesis Freestyle, and Maxim split keyboards or in conjunction with your laptop. Use it in any situation where a stand alone keypad is preferred. The 2-port USB hub enables you to easily connect other input devices such as mice without having to access USB ports on your computer.

Features For Comfort & Productivity

- **Integrated 2-port USB 2.0 hub:** connect up to two low-powered USB peripherals to free up ports on your computer.
- **Low-force and tactile mechanical key switches:** Designed in collaboration with the world's premium switch manufacturer.
- **PC Versions:** includes four additional highly used keys (ESC, Tab, Backspace & Keypad equals) for increased editing efficiency.
- **Long lasting lasered key legends.**
