

Acqua

The Acqua rotational ceiling fan offers fluid lines and quiet axial rotation. The motor heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods, the faster the axial rotation. A slow, controlled axial rotation is achieved by both motor head position and fan blade speed. Atlas rotational fans circulate heat and air-conditioning more efficiently than traditional paddle fans.

Constructed of cast aluminium and heavy stamped steel, the Acqua carries a limited lifetime warranty

- The Acqua is available in the following metal finishes:
 - > Polished Chrome
 - > Textured Bronze
 - > Brushed Nickel
- The Acqua is available with the following blade options:
 - > hand-balanced solid wood blades without blade guards
 - > hand-balanced metal blades with decorative metal blade guards
 - > hand-balanced metal blades with metal safety cages for low ceilings.

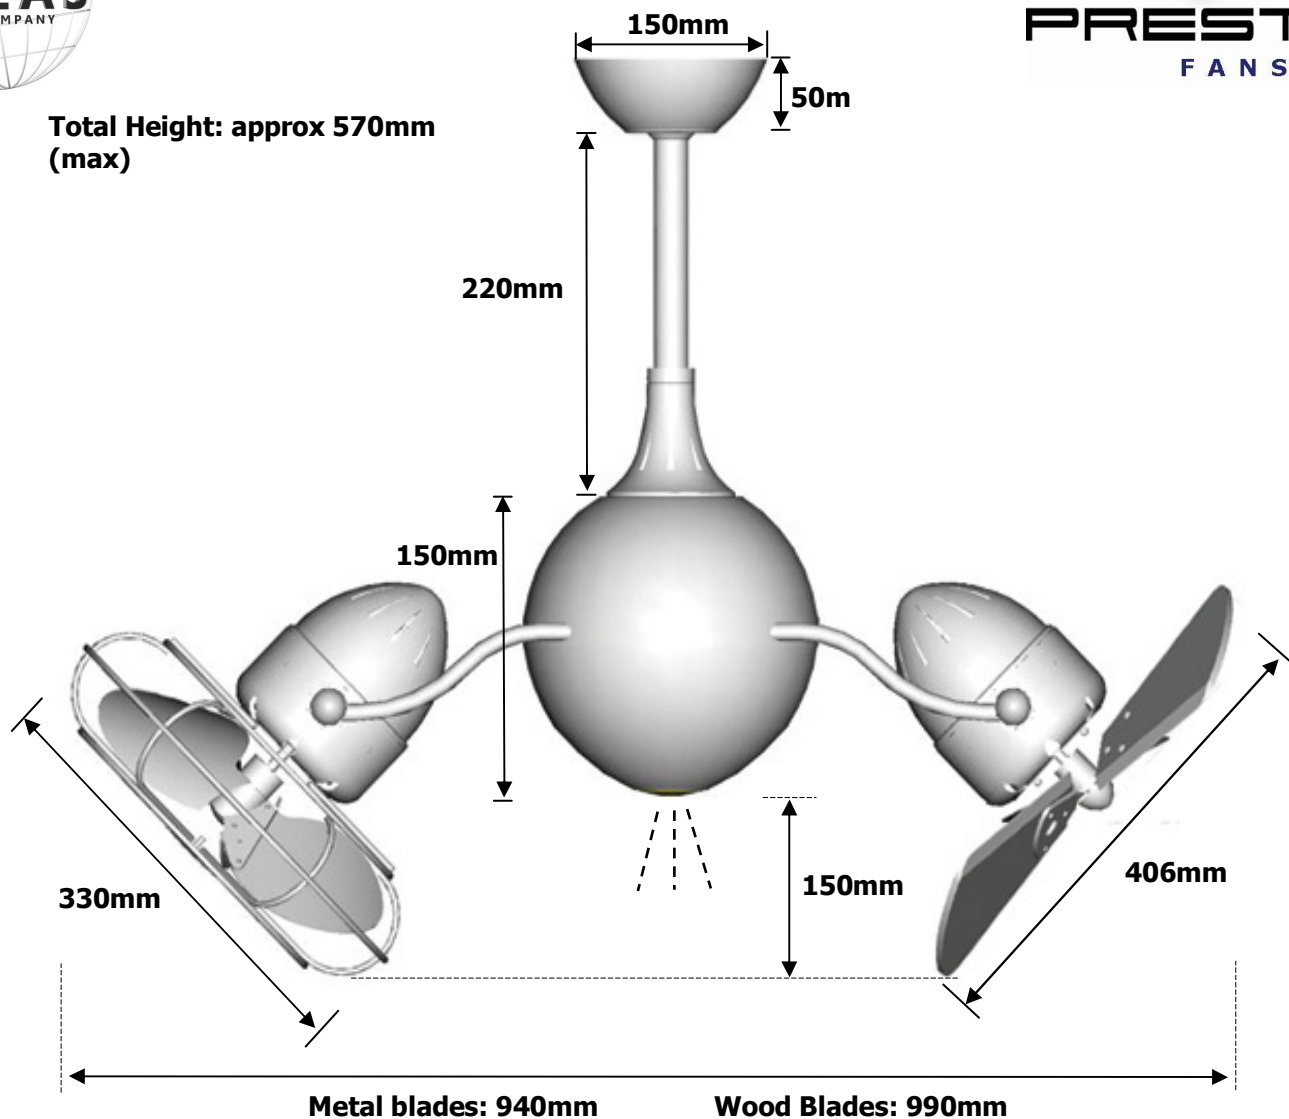

Total Height: approx 570mm (max)

PRESTIGE
FANS

Increasing angles of fan heads to support poles increases speed of axial rotation
Optimum fan head position is 60 degrees

Acqua

The Acqua is supplied with:

- Wall control with 3 speed mechanism and light switch
- Angled ceiling canopy for ceilings up to 29 degrees
- 10" downrod (can be cut if required)
- 50 watt GU10 halogen down light. (3W LED GU10 available on request)

Optional Accessories:

- RF remote control with wall cradle
- 30" (760mm) or 72" (1830mm) extension downrods.

PERFORMANCE:

NB: Performance testing carried out in laboratory approved for energy star testing and certification.

BLADE TYPE	SPEED	WATTAGE*	AIRFLOW ** (in M ³ /HR)	EFFICIENCY (in M ³ /HR/W)
Timber	High:	100.0 (Max)	10,490	104.90
Metal	High	100.0 (Max)	8,485	84.85

* Wattage for Energy Star data and is based on motor wattage as shown on rating label, actual performance may be lower consumption.

** Airflow data tested using Energy Star Solid State Method.
