

EXOTIC 37MM BIRD DOG TRAINING PROJECTILE INSTRUCTIONS

READ ALL INSTRUCTIONS BEFORE STARTING PROJECT

- 1) Prime a 37mm hull by placing a #209 shotgun primer in the hole on the flat side of 37mm casing.
- 2) Place a small amount of hot glue on the flat end of the powder bushing with the small hole and push it into the aluminum casing all the way to the base. (a screwdriver may be helpful in seating the bushing on the bottom of the aluminum casing)
- 3) Place **NO MORE THAN** 60 grains FFFG powder into a primed 37mm casing. (For best results use a 37mm aluminum hull with a powder bushing at the base)
- 4) Cut a small rag to fit inside the 4 ½" projectiles and insert it in the projectile.
- 5) Open the scent bottle included in the kit and thoroughly cover the rag with scent inside the projectile.
- 6) Place a small amount of hot glue on the edges of the payload cup cap and seal the 4 ½" projectiles.
- 7) Optional (use a scent covered rag and wipe down the outside of the projectiles)
- 8) Place two rubber bands around the base of the projectile one at ¼" up from the bottom and one at 1" up from the bottom.
- 9) Insert rubber band end into the aluminum casing and push down till it seats on the powder bushing. (The opposite end to the one with the payload cap)
- 10) Optional (Use hot glue to seal around the top open edge of the aluminum casing to create a waterproof seal)
- 11) Your round is now ready to fire.
