

MK FINE SURFACE POLISH

DIRECTIONS: Read entire label before using. Follow steps as directed. Shake well prior to use.

STEP 1: Clean surface using **MK Multi-Surface Cleaner** to remove all dirt and debris.

STEP 2: Pour a small amount (about the size of a quarter) of **MK Fine Surface Polish** directly onto a clean damp sponge or terry towel.

STEP 3: Apply to the surface to be polished and buff continuously in a circular motion for 2 to 3 minutes or until polish is thoroughly worked in.

STEP 4: Using a clean terry cloth, buff the surface with medium pressure in a circular motion until there is no visible polish left on the surface and the desired shine is achieved.

For best results, work in 2 by 2 foot areas at a time. Use **MK Premium Stone Sealer** or **MK Advanced Stone Sealer** every 6 to 12 months or as needed to maintain a layer of protection against dirt and stains.

MK Fine Surface Polish

is another custom blended product made in the USA for
