

MK INTENSIVE CLEANER

DIRECTIONS: Read entire label before using. Follow steps as directed. Test a small area to determine ease of application and desired results. **IMPORTANT:** Do not use full strength. Rubber gloves and eye protection are recommended.

STEP 1: Dilute two cups (16 oz.) of **MK Intensive Cleaner** per gallon of water.

STEP 2: Apply solution liberally to the entire area to be cleaned with a sponge or string mop.

STEP 3: Allow solution to stand for 3-5 minutes.

STEP 4: Gently agitate soiled areas with a soft hand brush or white scrubbing sponge using additional solution as necessary. **IMPORTANT:** Be particularly careful not to mar the surface when scrubbing polished marble and natural stone.

STEP 5: Remove soiled solution from surface with a sponge or string mop.

STEP 6: Rinse well with clean water.

Repeat process as necessary. **MK Neutral Floor Cleaner** is recommended as a final rinse and conditioning after the intensive cleaning process.

To remove spots or stains from liquids, food, alcohol or pets on polished natural stone surfaces use **MK Spot Removal Kit**. Regular use of **MK Premium Stone Sealer** or **Advanced Stone Sealer** is recommended for floors every 12 to 18 months or as needed to maintain the natural beauty of the surface and to provide a layer of protection against dirt and stains. For routine cleaning and conditioning of natural stone and tile surfaces, use **MK Neutral Floor Cleaner**.

MK Intensive Cleaner
