## MAKE A SANDWICH... BIKE!

Inspired by the concept of flat packing and home assembly, we were driven to develop a new bicycle concept: the Sandwichbike, a bike made out of two wooden plates! The contemporary design, the large surface of the frame and the absence of welding joints makes the frame visually attractive and easy to assemble. The bike will be delivered in a flat cardboard box and can be assembled at home with a few basic tools. With the excellent driving dynamics, the Sandwichbike is a unique and highly sophisticated product.

You can order Sandwichbike on [www.sandwichbikes.com](http://www.sandwichbikes.com)

Delivery time is 6 to 8 weeks.
