

Care Instructions

3 Steps to quick and easy wool washing

1. Hand wash in lukewarm water (30c) with an ecological wool detergent. Rinse in water the same temperature.
2. Squeeze out the water gently (do not wring), spread out on a dry towel, roll up in the towel and leave for an hour (overnight is fine).
3. Take the clothing out of the towel and hang up or lay flat to dry undercover (not in the sun).

Wool is highly resistant to stains, dirt and odours so your garment will not need frequent washing.

I have accidentally put the cotton blend fabric into the washing machine set at 60c with normal cotton clothes and found that it didn't shrink.

However I have shrunk the wool and wool silk blend clothes when I forgot to separate them from the usual wash.

I do not recommend washing any of these clothes in temperatures greater than 40c however the cotton blend clothing may be wearable if an accident does occur.
