

1

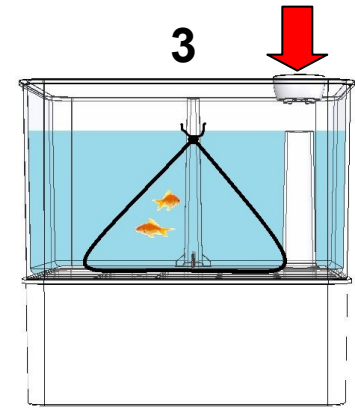

Place the Base on a level surface and fill with water to the level of the "FILL TO HERE" line. **DO NOT OVERFILL.** Push one end of the Hose onto the Pump outlet. Submerge the Pump with the electrical cable laid through the cut-out in the rear.

2

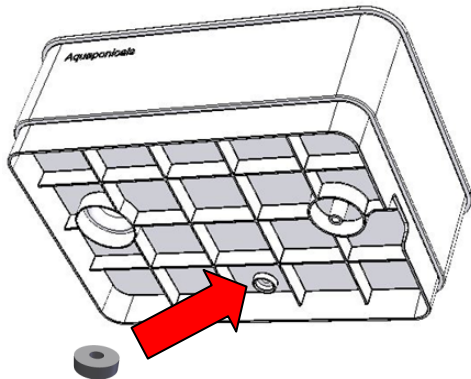

Insert the free end of the Hose into the underside of the Fish Tank Water Pipe until firm.

3

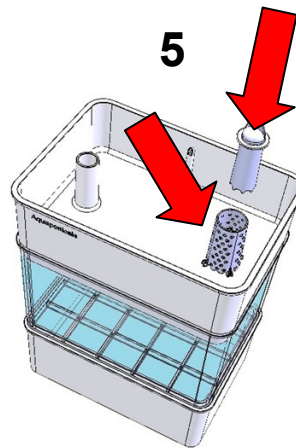

Place the Fish Tank on the Base and fit the Overflow Collar. Place the bag containing your fish into the Fish Tank and then fill the Fish Tank with water up to the top of the Overflow Tube. **DO NOT OVERFILL.**

4

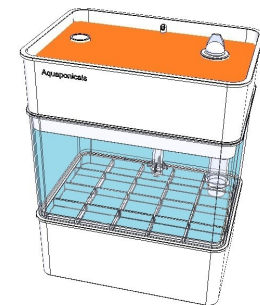

Wet the Gasket and then insert it into the underside of the Grow Bed where shown.

5

Place the Grow Bed on top of the Fish Tank. Insert the feet of the Shroud into the notches provided in the Grow Bed and then insert the Cap into the Shroud.

6

After thoroughly washing and draining the grow media, place it in the Grow Bed. **DO NOT FILL THE GROW BED WITH WATER.** Switch on the Pump.
