

Money Wishing Spell

©2009 Storm Faerywolf

Financial stability and success form the basis of one of the main areas of life in which practical sorcery is often concerned. For centuries people have sought after –and used –magical spells to bring great fortune and prosperity... or even just a little bit more to make ends meet. Whatever your goal or reason, here is a simple spell that you can employ in order to encourage spiritual powers toward the increase of your finances.

Items needed:

- A green “Wishing” (7 Knob) Candle (*alternatively, you may use a green taper or pillar candle, and mark it into 7 sections by sticking needles into it at regular intervals.*)
- Money Drawing oil (*or an oil/herb combination containing appropriate herbs, such as: Dragon’s Blood, Patchouli, Five-Finger grass, Chamomile, Mint, Cinnamon, Pine, etc.*)
- Seven each of pennies, nickels, dimes, quarters, and \$1 bills
- Three pieces of pyrite
- Some sea salt
- Dried patchouli leaves
- Money Drawing incense (*or herb combination associated with money drawing, such as those listed above*)
- A porcupine quill, or other instrument for carving onto a candle

This spell will be performed over seven nights.

Begin by taking a few deep breaths and centering yourself. Light the incense or herbs. Allow the smoke to wash over you and your area. Visualize the energies within the incense/herbs being released through the smoke and permeating the area with the vibrations of money and abundance.

Arrange the money on the altar with the paper bills in the center. Place the coins around this in a circle by placing first a penny, then a nickel, then a dime, then a quarter, repeating the process until the circle is complete. (You may also arrange them in their own circles; a circle of pennies, surrounded by a circle of nickels, then dimes, etc. Follow your intuition and artistic style.)

With the quill, carve your name onto the candle. If you have a specific dollar amount that you are in need of, then include that as well. *Example: “Jane Doe, \$500”.* Then, carve the “Success Sigil” on it: “\$\$\$\$”

Dress the candle with your oil, from the tips toward the center in order to “draw in” the energy. Place in a holder in the center of your working space, right on top of the paper money. Place the three pyrites in a triangle around this so that the shape points towards you.

Mix the sea salt and some dried patchouli leaves together and sprinkle it in a circle all around the candle, bills, coins, and stones. Feel how this is a “container” which will allow the energies within to build to maximum effectiveness.

Take a deep breath and make a heartfelt prayer for the money you desire as you hold the palms of your hands out facing the altar. Imagine the spiritual energy of this prayer flowing from you and infusing the objects on the altar. “See” it all shine with the green glow of riches and prosperity.

Light the candle and say:

*Money, money, money... I wish that I had more.
Faster to me, money come!
Of this I do implore!*

Meditate on being open to all the positive avenues through which money may now flow to you... allow the first section of the candle to burn down before snuffing out with an appropriate prayer.

On the next night, return to your altar and relight the candle with a prayer. Allow this next section to burn down and then repeat the process for the remainder of the nights. On the last night allow the candle to burn down completely. The money has now been charged to find more for you, so spend it wisely knowing that it will bring “friends” back for you. The pyrites have been charged for this purpose so keep them on your prosperity altar or in your house to hold this charge. The salt and patchouli leaves may then be used in a bath for added power. Bury the candle remains (if any) in your back yard. It is done.
