## FACT SHEET

### Overview

DoorBot is a sleek, simple and powerful wireless doorbell that streams live video of a home's front doorstep directly to a smartphone or tablet. The device is perfect whether home or away, enabling residents to see and speak with visitors at their doorstep.

DoorBot is installed in a matter of minutes and can be accessed through the free DoorBot app. It is also fully compatible with Lockitron, enabling users to let family and trusted friends into their home remotely.

With its perforated brushed aluminum faceplate, DoorBot's internal and external components are designed to endure the elements. Its camera captures quality video day and night and adjusts to the viewer's exact preference. Equipped with efficient Wi-Fi technology, DoorBot can be wired through the home's existing doorbell wiring and will run for over a year before needing to be recharged.

## PRESS RELEASE

### DoorBot Announces Ship Date and New Feature

Wi-Fi Enabled "Smart" Video Doorbell to Ship October 1, 2013 , Will Offer Unlimited Video Recording and Storage

NEW YORK – Sept. 20, 2013 - DoorBot, a simple yet powerful Wi-Fi enabled doorbell that streams live video of a home's front doorstep directly to a smartphone or tablet, today announced that it will begin shipping DoorBot units on October 1, 2013, and will offer unlimited, free video recording and storage to those who order DoorBot before October 1.

This new feature will automatically record the video stream of every visitor who rings DoorBot and store it in the cloud. DoorBot owners can then access the footage via the DoorBot portal online or through the free DoorBot app. Users will now have a video log of every visitor they receive, even when they cannot answer DoorBot's call. Those who order after October 1 can add this new video recording feature to their DoorBot for an additional fee.

"Thanks to the enthusiastic feedback we received from our backers, we were able make several improvements to DoorBot before manufacturing," said James Siminoff, inventor of DoorBot, "We added this feature as a way to thank everyone for their input, patience and dedication to DoorBot."

DoorBot, which launched on the crowdfunding site Christie Street in December and recently passed \$1 million in sales, enables residents to see and speak with visitors from anywhere in the world via the free mobile app. DoorBot is fully compatible with Lockitron, enabling users to let family and trusted friends into their home remotely. Customers can order DoorBot (\$199) or a package with both DoorBot and Lockitron (\$349) at [www.getdoorbot.com](http://www.getdoorbot.com).

Features include:

- Quick & easy DIY installation (including mounting level, screwdriver and screws).
- Ability to attach to existing doorbell wiring for both charging and ringing of bell.
- Operable on an internal rechargeable lithium polymer battery for one year.
- Secure faceplate and mounting elements to ensure the device is not easily stolen.
- Weather resistant: built to withstand humidity, rain, sleet, snow, ice and extreme heat.
- Night vision camera provides clear video day and night.
- Compatible with iPhone, iPad and Android devices.

About DoorBot

DoorBot is a simple yet powerful Wi-Fi enabled doorbell that streams live video of a home's front doorstep directly to a smartphone or tablet. DoorBot enables residents to not only see who is at their door, but also chat with them, so as to never miss a visitor. DoorBot is priced at \$199 or can be purchased with Lockitron (regularly \$179) for \$349. For more information visit: [www.getdoorbot.com](http://www.getdoorbot.com).

## PRESS RELEASE

### DoorBot Announces Updates at PSFK's Future of Home Living Experience

DoorBot, The Wi-Fi Enabled "Smart" Video Doorbell, Streams Live Video of Front Doorstep Directly to Mobile App

NEW YORK – July 23, 2013 - DoorBot, a simple yet powerful wireless doorbell that streams live video of a home's front doorstep directly to a smartphone or tablet, announced several new features to the device at last night's launch event for PSFK's Future of Home Living Experience!

DoorBot, which enables residents to see and speak with visitors via the free app, has undergone recent improvements.

New features include:

- Quick & easy DIY installation (including mounting level, screwdriver and screws).
- Ability to attach to existing doorbell wiring for both charging and ringing of bell.
- Operable on an internal rechargeable lithium polymer battery for one year.
- Secure faceplate and mounting elements to ensure the device is not easily stolen.
- Weather resistant: built to withstand humidity, rain, sleet, snow, ice and extreme heat.
- Nightvision camera provides clear video day and night.
- Compatible with iPhone, iPad and Android devices.

DoorBot is installed in a matter of minutes and can be accessed through the free DoorBot app. With its perforated brushed aluminum faceplate, DoorBot's internal and external components are designed to endure the elements. It's camera captures quality video day and night and adjusts to the viewer's exact preference. DoorBot is also fully compatible with Lockitron, enabling users to let family and trusted friends into their home remotely.

"DoorBot is what the modern doorbell should be. Smartphones and tablets are all around us—it only makes sense to be able to answer your door with them," said James Siminoff, inventor of DoorBot. "We have put a lot of work into making DoorBot the world's greatest doorbell."
