Xpanda[®]DIY

Real Security

When choosing your Xpanda product

Installing an **XpandaDIY** burglar guard is simple!

- 1 Do you have wood or steel framed windows?**
Select the correct burglar guard according to the header cards that are clearly marked WOOD or STEEL.
- 2 Measure the window frame opening of your window.**
Do not measure the window itself. Instead, measure between the inside edges of the frame of the window. To measure accurately, open the window completely and note the following:

A) HEIGHT: From the inside top to the inside bottom of the frame

B) WIDTH: From the inside left to the inside right of the frame

For TOP HUNG WINDOWS simply reverse the measurements i.e. height becomes width and the width becomes height.

Should your window opening be wider than the maximum widths indicated in this brochure, burglar guard extensions are available in store.

COTTAGE PANE WINDOWS

(for wooden frames)

WIDTH mm (excl. frame)	HEIGHT mm (excl. frame)	SIZE OF BURGLAR GUARD REQUIRED
480 - 510	160 - 340	2 pane
