The Alula-TREK is ready to make the journey wherever the lift takes you. The world’s most popular bird-like RC flying wing is back and more refined than ever. Whether you’re hiking on a mountain ridge, riding the breeze on a dune at the beach, or searching for thermals at the neighborhood park... the Alula-TREK is ready to go. Be inspired: fly where you never considered.

Wingspan
900mm (35.4 in)

Wing Area
16.71 dm² (259 in²)

Weight
156-170 gm (5.5-6 oz)

Wing Loading
9.3-10.2 gm/dm² (3.1-3.3 oz/ft²)

Controls
2 Channels (elevons)

Skill Level
EVERYONE!

Assembly
Under an hour

Flight Style
Nature-inspired light lift performer

REQUIRES:
Transmitter with programmable elevon mixing and dual rates, 2 sub-micro servos, receiver, rechargeable battery, small tools. *Painted wingtip color scheme not included.

The Alula-TREK was developed from the ground up to provide pilots of all skill levels a unique RC soaring experience with minimal building skills required. Getting into the air has never been easier. The most refined Alula yet is ready to get out and glide, when you are.

KIT FEATURES
- “ARG” Almost Ready to Glide- NO GLUE interlocking design uses rare earth magnets
- Wide flight envelope navigates thermals with ease and can be ballasted to handle the gusts
- Precision-molded EPO foam and composite parts ensure a lightweight and durable airframe
- Wing retention system allows for quick break down and assembly at any location
- Easy wingtip launching for both left and right-handed pilots
- Designed to go where your spirit for adventure leads you!

Modular Design - a clever interlocking design ensures perfect wing surface alignment and a secure fit to the fuselage.

With a quick turn of the screwdriver, the Alula-TREK's wings can be secured or removed in seconds.

A rugged factory-installed belly skid is ready for those rougher touchdowns.

Roomy radio compartment with magnetic hatch provides easy access to your receiver and battery.

If the wind comes up, you will be ready! Quickly add or remove ballast from the Alula-TREK depending on the conditions.
Hit the trail or head to the airport - the Alula TREK is ready to be packed away for any adventure that may lie ahead.

Ready for retail - colorful and informative packaging is ready to stand out on the hobby shop shelf!

Get out and glide! Dream-Flight has been creating forward thinking RC gliders since 1996. Our goal is to develop unique aircraft that are pure fun to fly. Our passion is designing quality, affordable R/C aircraft that get more people outdoors to enjoy the wind and sun!
