### **C&M Lighting Installs Powerful UFO Lighting Solution into the famous International Marketplace in Las Vegas, NV**

**(Las Vegas, NV, March '20)** – Voted the Best International Grocery in Las Vegas, C&M Lighting was selected to upgrade lighting at this landmark facility to make the food and experience even more delicious. The International Marketplace provides a full assortment of foods from all over the world and appeals to any and all tastes. If specialty foods – fresh, frozen, dried, canned – are needed on the Strip or around the region, the International Marketplace is the place to go.

“The industrial look and feel of the International Marketplace is part of its charm – and why our UFO 200W was an ideal choice,” says James McKay, owner of C&M Lighting. “Plus, I’m based out of our Las Vegas office and a frequent visitor. It would have killed me if another light had been used. First Step Innovations installed our lights and we’re with them on a variety of other projects in the Las Vegas area.”
