*Not available due to insufficient producers

Prices are in thousand board feet, lumber scale.

Quarterly averages are shown in parentheses.

These index prices reflect the trend of weighted prices for the entire area producing inland species. The grade percentages used are based upon the Association's analyses of realization of the various grades for each species in the years shown. All prices are subject to a cash discount; sales commissions or sales discounts are deducted. Any claims or allowances have not been adjusted. Index levels are estimated to be representative of market levels experienced four to eight weeks prior to publication.
