Parts Name:

- A. Eyepiece
- B. Zoom ring
- C. Focus ring
- D. Focus fine (1/10)
- E. Cradle
- F. Cradle lock knob
- G. Mounting shoe
- H. Objectives lens
- I. Tripod platform

CAUTION

Viewing the sun case cause perma-nent eye damage. Do not view the sun with this instrument or with the naked eyes

How to use :

1. Attach spotting scope to a firmly positionned tripod by mounting scope mounting shoe (G) on tripod platform (I)
2. Remove protective caps on Objective Lens (H) and eyepiece
3. Loosen cradle lock knob (F). Rotate spotting scope within its cradle (E) to set scope in a comfortable viewing position and then the cradle lock knob
4. Turn zoom ring (B) to lowest magnification. Look into eyepiece (A) and turn focus ring (C) to focus object clearly
5. Use focus fine (D) to adjust the fine focus (1:10)
6. Turn zoom ring to desired magnification. Re-adjust focus as needed.
