Chroma Gel 1 Step is made with a unique formulation which cures fast and leaves no sticky residue. There is no need for a "Top Coat" or "Base Coat" due to the clever way Chroma Gel 1 STEP cures.

Treatment time is dramatically reduced to 15 min which means less time more profit for you and your salon. Once the colour is set in a UV or LED lamp your client will be amazed with the beautiful flawless colour and finish to their nails, lasting for 2 weeks your clients will return for more.

Its really so simple just Paint - Cure - Go.

Chroma Gel 1 STEP is easily removed and leaves the nail healthy and strong.

Step By Step

Paint

Buff the nail.
Paint on the 1st
coat very thin.

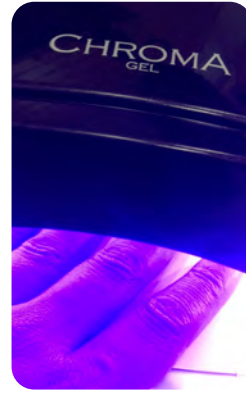

Cure

30 seconds LED
120 second UV

Paint

Paint the 2nd coat
on to show the
colour.

Cure

60 seconds LED
120 second UV

Done !!!!!

Removal

Buff the top layer off to break the seal.
Wrap in acetone for 10-15 minutes
Push off the residue with an orange wood stick.

No Wipe Top Coat option - Not Compulsory

If your client needs more durability no wipe top coat will help longevity.

After step 5

6. Paint one coat of No Wipe To Gel and cure

Chroma Gel LED FREEZE LAMP - 30 seconds.

36 watt UV Lamp - 2 minuets.

7. Paint the second coat of No Wipe top gel and cure

Chroma Gel LED FREEZE LAMP - 60 seconds.

36 watt UV Lamp - 2 minutes.

Thats it All Done!!!!

GEL

Mixing application instructions

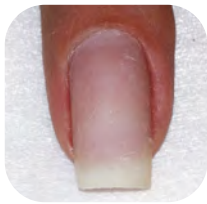

Features & Benefits

- No drying time
- More strength & durability
- Unique colours
- Self leveling
- Lightweight and flexible

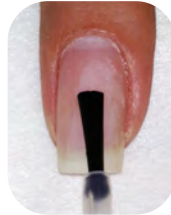

What You Need

- Chroma Gel,
- Finishing touch,
- Primer,
- Bonder,
- Buffer 180 or 100 grit
- Gel Brush
- Cleanser,
- 36 WATT UV Lamp.

Step 1 Prepping for Chroma Gel Mix

1. Buff the natural nail

2. Remove all dust.

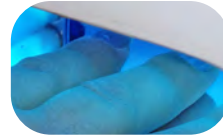

3. Use an acid free primer on the nail plate.

4. Brush a thin coat of bonder across the free edge.

5. Apply 1 coat of Chroma Gel. Cure for 2 minutes.

6. Wipe off the sticky residue with a lint free wipe saturated in gel cleanser.

7. Buff the surface of the Chroma gel gently with a 300 or 360 grit buffer to remove the shine.

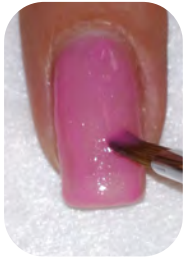

Step 2 Mix your Polish with Chroma Gel

First Mix your Chroma Gel and Nail Polish/Varnish in a Dappen Dish. Mixing Ratio - Depending on the size of your brush - 1 Part Chroma Gel, 2 Parts Polish .

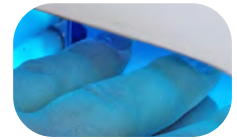

**** Top Tip(If your polish is light in colour mix 1 drop CG 3 drops Polish)**

Step 3 Apply your Mixture to the Nail

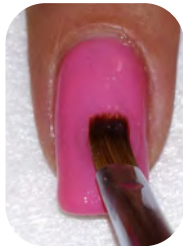

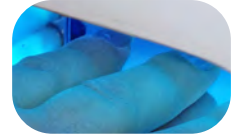

1. Apply your 1st coat of Chroma gel mix on the nail and cure for 2 minutes.

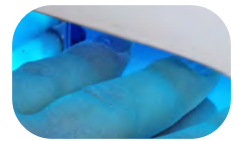

2. Apply a second coat of Chroma Gel mix gently over the first layer making sure to seal the free edge, and cure for 2 minutes.

(If a 3rd layer is required it can be applied now).

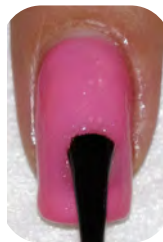

3. Apply one coat of Chroma gel (Without Polish) and cure.

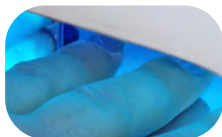

Step 4 Apply your Finishing Touch

1. Apply on 2 thin coats of **Finishing Touch**:

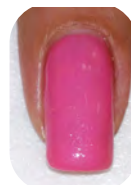

Paint on the 1st coat of **Finishing Touch** and cure for 2 minutes and repeat.

Finally

1. Wipe off the sticky residue.

2. Apply peach cuticle oil.

Chroma Gel Removal

1. Use a 180 grit nail file to gently file the surface of the finishing touch to break the seal and remove shine.
2. Saturate a cotton wool with acetone and apply to the top of the nail
3. Wrap in foil for 10 minutes.
4. Firmly pull the wrap from 1 nail at a time with a twisting motion. If there is more product left on the nail rewrap and allow the acetone to soak in to the product for a few more minutes.
5. Use a orange wood stick to remove any excess Chroma Gel from the nail.
6. If you are not reapplying Chroma gel buff with 300 or 360 grit buffer and buff to the natural shine.
