- **Mouthwatchers** (mouthwatchers.net) Mouthwatchers Toothbrush is the first toothbrush that

utilizes nano-silver technology to eliminate germs on the mouth, teeth and gums as well as keep the toothbrush itself free from germs. Even on a normal toothbrush at home, much less one sitting in a humid travel bag after sitting around in various hotels, there are more than 100 million microorganisms (not to mention countless more inside people's mouths), contributing to illness and tooth and gum disease. Every traveler has had the experience of looking in their travel bath bag and seen a grimy toothbrush and felt the presence of every one of those 100 million. Retailing for \$3.99 each, Mouthwatchers Nano-Silver Anti-Bacterial toothbrushes can be purchased online at mouthwatchers.net or at dental offices throughout North America.
