Breath boosters

Binaca was the hip/cool breath freshener of my day, so I shouldn't be surprised that it's now marketed as "not your Mom's Binaca drops." This new generation of very yummy mint and cinnamon tiny aerosol sprays and FastBlast pumps are designed to appeal to the fashionable club crowd with their teeny purses. No matter. Garlic lovers of all ages should love the flavor and convenience.

The Nano Silver doesn't sound like something to put in our mouth, but the anti-bacterial toothbrush might become your new favorite. **MouthWatchers'** dual-action bristles are soft and thin on the outside, like dental floss, and harder on the inside. They also reduce bacteria by 99.9 percent within six hours. It's the best hand-held toothbrush I've ever used.
