

# Ego-O Instructions and Maintenance

For safe and effective use of the product, please read through the following information carefully before use.

Your Starter Kit contains:

- ① - 1 x Large eGo Case
- ② - 2 x eGo-O 1100mah Batteries
- ③ - 2 x CE4+ Atomizers
- ④ - 1 x Juice bottle with Needle
- ⑤ - 1 x USB Charger
- ⑥ - 1 x AC Adapter (240VAC AU/NZ)

## CHARGING:

*TIP:* First Time Charge :

**Fully charge your eGo batteries for a full EIGHT HOURS BEFORE USE.**

- Remove the AC Adapter⑥ from the kit and plug into the wall.
- Plug the USB charger ⑤ into the AC Adapter. Gently screw the battery ② into the USB Charger fitting but **DO NOT OVER TIGHTEN!**
- With the AC power on, the blue light on the battery illuminates when the battery is sufficiently tight and is now charging. The light on the USB Charger will initially illuminate RED and will change to GREEN when charging is complete. For the first charge, please wait the recommended **eight hours** before removing your battery from the charger in order to gain the best future performance.
- In order to get maximum performance from the eGO-O batteries, it is recommended that you do not recharge a partially flat battery. Charge only when a battery is completely flat and the blue LED flashes.

Each battery can be recharged approx. 300 times. As the battery gets older it will loose charge more quickly. When the battery will not hold charge for a satisfactory period of time it will need to be replaced.

Do not use your charger in damp areas or near a high temperature heat source or heater. Do not open or pierce the AC Adapter or USB charger. If the AC Adapter or USB Charger is found to be emitting any odour or excessive heat or is discoloured or deformed please disconnect from the power and discontinue use.

**Please keep your eGo eCig batteries and atomizer out of the reach of children and animals.**

## ASSEMBLY:

Once the LED light on the charger turns GREEN your battery is fully charged and can be attached to the Atomizer(3) for use. **GENTLY** screw the top of the battery into the base of the Atomizer – **DO NOT OVER TIGHTEN.**

## FILLING THE CE4+ ATOMIZER

Unscrew the Driptip from the Atomizer.  
Remove the needle tip cap from the Needle bottle ④ and pour e-Liquid into the needle bottle and replace the needle tip on the bottle.

Using the Needle bottle, insert the needle tip down the inside of the Atomizer. DO NOT ATTEMPT TO FILL LIQUID INTO THE CENTRE HOLE.

Gently squeeze the needle bottle until the eLiquid reaches approx. 1.4ml-1.6ml. Do not fill the atomizer above the white silicon cap on the centre post.

When the atomizer is full, replace the driptip securely. Do not over tighten. Allow 3-5 minutes before first use to allow the e-Liquid to be absorbed into the wick.

## USING THE ECIG

Attach the atomizer to the battery. Press the button on the battery and inhale. Release the button when not inhaling. Pressing the button without inhaling may damage the atomizer and will reduce the life of the atomizer. Holding the button for more than 10 seconds will cause the light to flash 8 times and the cut power to the atomizer automatically.

Refill the atomizer when the eLiquid becomes low. Using the eCig without eLiquid will damage the atomizer.

The expected life of the atomizer under normal regular usage is approximately 4-5 weeks.

If the battery light flashes when pressed, the battery requires recharging. Fully recharge the battery before re-using.

Pressing the button FAST 5 TIMES switches on/off the battery. This is useful if placed in a handbag or pocket, or if left where children may pick up the eCig.

## CLEANING THE ATOMIZER

Your atomizer can be dismantled for cleaning. Unscrew the drip tip from the plastic body. Unscrew the metal base (with the centre metal tube from the plastic and wash in warm (not hot) soapy water and then rinse several times. Allow 24-48hrs to dry. When refilling the cleaned atomizer treat as new and allow 3-5 mins for e-Liquid to soak into the wick after filling.

Atomizers have a limited life and need replacing on a regular basis. New atomizers can be purchased cheaply and easily. For replacement atomizers, e-Liquid or batteries please contact:
