

Active Heating Marine Mud

Active Heating Marine Mud is a genuine thalassotherapy (European spa)

treatment. The draining and anti-inflammatory effects of marine muds are well known, as are their relaxing and cellulite controlling properties. **Active**

Heating Marine Mud's foaming texture makes application easy and allows increased cellular exchanges.

Boue Marine Active Chauffante

Code 15122

The detoxifying power and ionic transfer capacities of marine mud have been clearly demonstrated.

Active Heating Marine Mud contains marine silt, marine clay and micronized algae, rich in trace elements due to the high mineral content of sea water.

According to numerous medical studies, these elements have ionic exchange capacity through skin. Studies have also demonstrated the detoxifying powers of marine mud.

Cellular exchanges are enhanced by the heating effect and foaming texture of this marine mud.

MARINE MUD

Organic matter	6 - 10%
Mineral matter	80 - 88%
Calcium	1 - 4%
Sulphur	0.1 - 1%
Magnesium	0.3 - 1%
Iodine	0.1 - 0.2%
Fluorine	0.05 - 0.1%
Manganese	200 ppm
Zinc	400 ppm
Iron	20 - 50 ppm

Percentages provided for informational purposes only.

DIRECTIONS FOR USE

Mix 5 to 7 oz (150 to 200 g) of powder with 6 to 8 oz (170 to 220 ml) of cold water until a homogeneous paste is obtained. Quickly apply the paste using a spatula to those areas of the body in need of treatment.

INGREDIENTS	Marine silt - algae - magnesium
PACKAGING	Bulk Bag : 25 kg Pail : 2 -10 kg Packets : 150 -300 g
STORAGE	Avoid light, heat, humidity. Shelf life: 3 years
