

Great TIPS on cutting out your set!

1. Use a new pair of scissors that have **not been** used to cut paper or anything other than material.

2. **Rough cut** the pieces (*cut around the pieces leaving the white around it*) and ► organize them in the file system.

3. Neatly cut the figures needed for your first story. In this way, it is possible to begin using your set the first week - when you **fine cut** the pieces you need story by story.

Example

OR

*Have a
cutting party!*

To make your cutting fun and enjoyable invite friends and relatives for snacks, fellowship and a cutting party!
