

“Hi, we bought a peregrine falcon kite from you last year for use on our vineyard, and I just remembered I hadn't sent you any feedback as promised. It certainly did more than we thought it would. Amazingly strong, no ripping or breakage (and we are in a windy area), and it certainly had a deterrent effect on the birds we wanted to deter. The local falcon population didn't seem to care two hoots about it being there, but the pest birds sure did. If only we could train it to fly the right way up more often, it seemed to like flying upside down at times. Will work on that this coming vintage. Thanks again. - Mandy & Paul (Hawkes Bay)

“The Falcon Kite I bought early March has done a great job in our 3 acre vineyard. We had covered the vines with nets but there were too many holes and the birds were causing lots of damage. After mounting the kite on the 9.2 metre pole, the bird damage greatly reduced. Each time I set the kite flying near a Macrocarpa hedge, a lot of birds would fly off in the opposite direction. It has been a very worthwhile purchase. - KVT (Upper Moutere)

“Just wanted to let you know that I received the peregrine falcon kite yesterday. Once I had assembled it, I decided to try it out in the back yard. The birds just disappeared! Now I can't wait to mount it out above my crop. - SL (Canterbury)

“We have purchased an Osprey in early May. It is flying over our dock, hoist and two boats. The Osprey keeps the ducks, geese, and sea gulls completely away. It works great if you want a clean dock, hoist cover and boat interior. We have recommended Jackite kites to many lake front property owners and friends.” - Linda D.

Is doing great job scaring off unwanted ducks - Nicola (Balclutha)
