

"Fred the Terror Eye Owl" has been put on duty for three weeks now. I can't believe how clean my boat is! My slip neighbors laughed when I first installed the Terror Eyes balloon, but I bet I will soon see more of them showing up in the harbor. I purchased Terror Eyes to ward off pigeons and seagulls which were creating a large mess. It consumed four hours a week of my time just to clean the exterior of my boat. Thanks for a great product!

The Birds simply disappeared. It is really unbelievable since we had virtually flocks of birds in our commodity shed where we store feed for dairy cattle. Birds had been roosting, eating and messing in our commodities. We tried unsuccessfully to scare them away with BB guns and other assorted gimmicks to no avail. We decided to give one of your Terror Eyes a try; what did we have to lose? I'm happy to report we have not had a single bird in the commodity shed since then. We've been recommending it to anyone who mentions a similar problem.

We just wanted to share with you how delighted we are with your product! We purchased your Terror Eyes bird repellent system for use on our sailboat. The work beautifully! We string them up the mast with one at the top, one at the spreaders, one near the bimini and an additional one over the boom. Since they have been installed, it is a pleasure to find our boat clean. We have observed that when birds approach, they detour our boat. It is amazing. Thank you for your ingenious solution to a very annoying problem.
