Instructions

Please follow the instructions below carefully to ensure that you provide us with accurate foot outlines.

- 1 - Use two pieces of paper (you can draw over this form) it is important we get outlines of both of your feet.
- 2 - Wear a thin pair of socks when you are drawing around your feet. (Thick socks will distort the foot shape and can add up to half a size to your foot measurements.)
- 3 - Stand on an A4 piece of paper with your weight over the ball of your foot. Using a pen held straight up and down trace around the outline of your foot. (this will be easier if you can get someone else to trace the outline for you).
- 4 - Repeat step 2 for the other foot on a second piece of paper.
- 5 - Using a ruler measure the length and width of each foot and put the measurements in the space provided.
- 6 - Gather the two completed foot outlines and either scan and email both sheets to info@stagersport.co.nz or fax the drawings to +64 3 448 8622

Example

Please complete all sections on this form, and then send copies of your left and right foot drawings to:
info@stagersport.co.nz or fax to +64 3 448 8622
