

On 1991 to 1993 Sportster ----- VP-Sport

As there is little clearance between the VP clutch and the primary case it is not possible to install VP005-150,190, 240, 320 on the early 1991-93 XL models with a standard primary cover. On '91 to '93 Sportster requires a '94 to '03 primary cover due to a clearance issue. When purchasing, please make careful note of your bike's year model. A normal VP clutch installation is possible by using one of the following primary covers:

- #25430-94A [Polished] •#25460-94 [Chrome] •#25471-97Y [Silver]

To make sure note down the bike identification number.

1 HD 4 CA M 1 M Y 110000
