

VP and Clutch spring combinations

40% more performance out of stock clutch!!

The VP clutch is the most cost effective kit to up grade your H-D stock clutch without any modifications.

Up to 40% reduce clutch lever effort.

Up to 40% more additional pressure to make a stronger clutch.

VP and Clutch spring combinations

There are many combination of VP and clutch spring. The VP70T with a stock spring is good for up to 88" motor. But if you use 380lbs spring (Screaming Eagle spring) with VP70T, this combination will be good for up to 103" motor. So, the VP70T with 380lbs spring has the same performance as the VP84T with a stock spring.

For example:

The 103" (1690cc) motor with S.E. heavy duty spring. If you are looking for something to reducing clutch lever effort, we recommend using the VP70T. You will have about 40% reduce clutch lever effort from S.E. heavy duty spring (See the orange line in the Chart).
