Services

Managed IT Services

Tier-1 Help-desk Services, providing tablet hardware and operating system support Monday-Friday, 9 am to 5 pm. In-depth troubleshooting or access is coordinated through local desk-side support resources.

Tier-2 Services, providing tablet hardware and operating system support Monday-Friday, 9 am to 5 pm. Remote troubleshooting tools are utilized. This service provides resources to assist Level-1 support in resolving technical problems and investigating elevated problems by confirming problem validity and seeking known solutions for more complex issues. This is suitable for locations where there are no local desk-side technicians available for advanced troubleshooting.

Network Monitoring and Management Services include alert/alarm monitoring, device operating system patch management and performance reporting. These functions provide effective problem diagnostics and statistical gathering of traffic to enable more efficient administration and network tuning.
