

INTRODUCING LINDNER-UNITED *Baseline Complete 900 Series!*

This exciting new series of complete meal show feeds is manufactured through partnerships with regional feed mills throughout the Midwest that are dedicated to strict quality control/quality assurance standards. The 900 series is a lower cost meal feed that is formulated with the needs of the junior swine exhibitor and breeder in mind. For additional results, Lindner United supplements and specialty products may be added to the diet.

All LINDNER-UNITED BASELINE COMPLETE DIETS FEATURE THE FOLLOWING:

- A blend of highly digestible protein ingredients that maximize digestibility and overall pig performance.
- Optimal levels of micro-additives, amino acids, vitamins and minerals needed to promote growth, maintain gut integrity, and overall health of the show pig.
- A blend of ingredients and nutritional strategies to allow a seamless transition to subsequent diets in the 900 series as well as other Lindner-United products.
- Added protection from potential performance losses caused by Mycotoxins (Aflatoxin, Vomatoxin, Zearelanone) commonly found in grain.

STARTER NUTRITION – Baseline Complete #920

Crude Protein: 20.5% | Lysine: 1.4% | Fat: 5.0%

This early-phase nursery diet is formulated with a nutritional strategy designed to seamlessly transition young pigs from a pelleted pre-starter diet to this highly palatable meal starter feed. LU Baseline Complete 920 drives intake and promotes optimal growth in pigs weighing 25-50 lbs, but can also be fed up to 75 lbs as a sale preparation feed.

STARTER NUTRITION – Baseline Complete #930

Crude Protein: 19.5% | Lysine: 1.3% | Fat: 5.0%

This late nursery/early grower feed is formulated to follow 920. This unique formulation is designed to meet the nutritional needs of newly purchased show pigs weighing 50-125 lbs. LU Baseline Complete 930 allows pigs to easily transition from starter feeds to grower feeds.

GROWER-FINISHER NUTRITION – Baseline Complete #970

Crude Protein: 17.5% | Lysine: 1.1% | Fat: 4.5%

This grower ration is formulated to optimize muscle growth and structural development in pigs weighing 100 lbs through market weight. LU Baseline Complete 970 is designed to encourage growth in rib, body and also add condition. Depending on the look you desire your pig to have on show day, you may want to consider switching to the lower protein option, 980, at 200 lbs.

GROWER-FINISHER NUTRITION – Baseline Complete #980

Crude Protein: 16% | Lysine: 0.9% | Fat: 4.5%

This late finishing ration is designed to allow for continuous development, as well as add additional body and rib shape in pigs weighing 125 lbs and above. LU Baseline Complete 980 can be fed as the last phase in the Baseline Complete Series as a great lower protein option for pigs that are harder in their appearance.

SOW NUTRITION – Baseline Complete #990

Crude Protein: 14.5% | Lysine: 0.8% | Fat: 3.0%

This core sow ration is formulated to meet the gestation requirements of today's show sows and gilts. LU Baseline Complete 990 has the added benefit of being formulated with a specialized direct fed microbial product consisting of scientifically selected strains of Bacillus Subtillis that have been shown to be effective in maintaining gut health and improving neonatal pig weight and survivability. LU Baseline Complete 990 also contains a laxative and can be enhanced to meet the nutritional needs of a lactating sow by top dressing 1 lb of Priority One at each feeding.

FOR THE FINAL 30 DAYS – 611, 613, 614 Scud Missiles

Feed Scud Missiles the last 30 days prior to your target show to add body and mass. The most unique feed on the market for getting pigs ready for show. Available in a pellet as 611, in meal form as 614, or in a pellet form with 9 grams of Paylean™ as 613.

*Speciality Products*

Priority One – #61100

Vitamin P – #61101

Make your sow the #1 priority! Formulated to stimulate appetite and get sows started on feed as quickly as possible after farrowing.

Taking Paylean™ to another level! Includes the most comprehensive probiotic and yeast profile for superior digestive function, and the elite Feet First® program for foot and pad integrity during stressful feeding periods.

Life Saver – #61102

TNT – #61105

For use in show pigs to maintain a healthy appearance and freshness. Use as an added electrolyte and energy source. Perfect for keeping the right look on sale and show day. The ultimate appetite stimulant!

TNT is a unique filler that explodes, softens, and maintains freshness.

Full Figure – #61108

System Mechanic – #61111

A coconut oil-based fat product designed to get fast results and maintain a strong appetite without slowing them down.

Joint, skeletal, and gut...all in one! The only supplement of its kind. You will be blown away with the level of consumption, joint comfort, and skeletal development.

Tune Up – #61112

Tune Up is a highly palatable supplement designed to optimize condition for target shows and get pigs "show ready" in up to 5 days.
