

ALTO Steps Installation

Before installing your Alto Steps, take time to arrange them on your stairs.

To install your Alto Steps, simply cut a piece of mesh off the roll about two inches shorter than the length of each carpet tread and place it, yellow plastic side up, about an inch from the front edge of the step. Peel off the plastic carefully.

Next, place the Alto Step on top of the mesh making sure to set it back slightly from the edge of the step. This is an important safety measure to prevent it from hanging over the edge and becoming an obstacle.

If you need to reposition or remove the adhesive mesh, it can be done easily, without harm to your stairs. This product is non-toxic and is made with a water based adhesive.

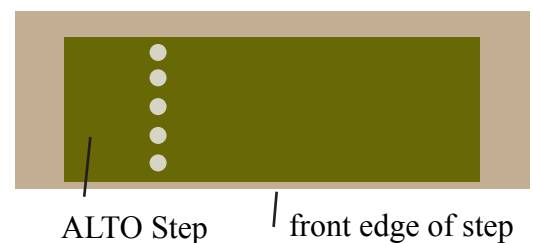

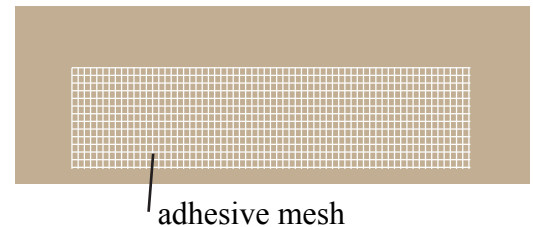

Care and Cleaning

After installing your Alto Steps, leave them in place as much as possible. Vacuum side to side and around the edges without lifting up the rug. If you do need to clean your Alto Steps, they can be removed and cleaned with mild soapy water. Avoid excessive scrubbing. Alto Steps can also be professionally steam cleaned.

We strongly advise that you replace the adhesive mesh every year or so, especially if your Alto Steps have been taken up often, as lint can build up and reduce the effectiveness of the product.
