BRINGING YOU
OUT OF THE
DARK AGES.

AEI provided T5L-454 fixtures to replace existing 400 watt acrylic hibays 1 for 1. Because this facility has skylights AEI utilized the daylight occupancy sensors in the aisles. Even when occupied some fixtures will not turn on because of the adequate daylight in the building. This project was such a success that Callaway has implemented AEI fixtures throughout all of their facilities. In addition, San Diego Gas & Electric (SDG&E) gave Callaway a large rebate to offset initial costs due to the energy savings.

Callaway achieved over 50% savings and improved their existing light levels.

AEI Lighting Summary for CALLAWAY GOLF

Application:

Distribution Center, T5 Fluorescent High Bay for Aisles

AEI Fluorescent Fixture Used In Solution:

AEI Lighting's T5L-454 Linear High Bay Fluorescent Fixture

Savings Summary:

AEI's T5 Fluorescent T5L-454 industrial lighting fixtures replaced Callaway's 400-watt ACR fixtures and saved over 50% on energy usage over the ACR fixture.

About AEI:

AEI Lighting provides T5 fluorescent industrial lighting fixtures for all applications, including distribution centers, manufacturing facilities, warehouses, cold storage, commercial exteriors, site/area parking and extreme environments.

AEI also provides Induction and LED Lighting fixtures for roadway, site, area, parking, garage, high bay, gas station and commercial exterior applications.
