

DR PEPPER ACHIEVES OVER 60% ENERGY SAVINGS WITH AEI FIXTURES

- AEI'S T8L-632 REPLACES 400W METAL HALIDE
- 170 INPUT WATTS VS. 460 WATTS
- 60% ENERGY SAVINGS
- LIGHT LEVELS INCREASE 40-90%

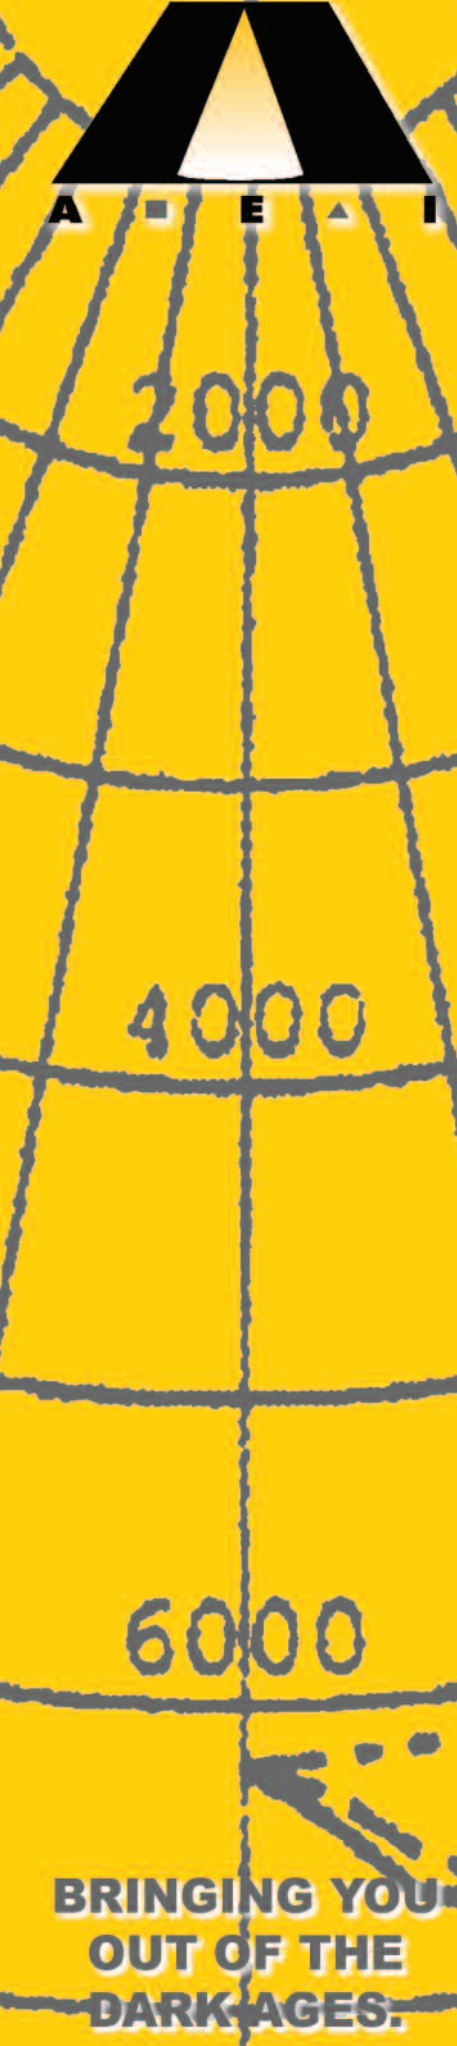

Dr Pepper in Dallas Texas upgraded existing 400W recessed metal halide HID fixtures (460 input watts) with AEI's 632 recessed and pendant mounted high-bays (170 input watts). The energy savings was over 60% and the existing light levels improved 40 to 90% overall. Dr Pepper chose the lens option over coated lamps for their production areas. AEI's unique airflow door design provides full light output utilizing 800 series T8 lamps and cool operating temperatures to insure long ballast life. This project qualified for a utility rebate and is another fine example of how AEI can brighten your space and improve your bottom line.

Light Levels improved 40 to 90% overall with AEI
