

LIGHTHOUSE FOR THE BLIND CHOOSES AEI KITS TO RELIGHT THEIR SPACE

2000

- Converted F96T12 Strips with T8KIT-232
- Increased light levels over 30%
- Saved 50 watts per fixture

4000

Lighthouse for the Blind had F96T12 strips and were looking for more light and to cut their energy costs.

The AEI Kit provided the socket plates, MIRO 4 reflectors, 800 series lamps and new electronic ballast to convert their existing strips. The results were better than expected, increasing the light levels over 30% and cut energy usage by over 50 watts per fixture.

6000

**BRINGING YOU
OUT OF THE
DARK AGES.**

Saved 50 watts
per fixture

The light levels increased 30%
over the F96T12 strips with AEI's
8 foot kits.
