

# Enterprise Cloud Backup, Sync, and Mobile Access Data Sheet

---

## The cloud backup advantage

---

### Simple

Seamlessly manage backup, sync, and mobile access for multi-user and server environments from a single web-based console.

### Secure

Your data is safe with military-grade encryption, world-class data centers, and EMC—a company built to last.

### Affordable

Keep costs low with no hardware to purchase and minimal overhead required.

## Worry-free cloud data protection for the enterprise

As an IT professional, you know the importance of keeping your corporate data safe. The critical task of remote backup can be an expensive and challenging endeavor for large businesses.

Our online backup solution makes remote enterprise backup for your computers and servers simple to manage and easy to use. Packed with enterprise-grade features, our solution saves you time and money with a simple, secure, and affordable remote backup solution that doesn't take months to set up, require thousands of dollars of new hardware costs, or force you to hire more administrative overhead. Our solution can be deployed to multi-user environments in a short amount of time so you can be backed up in virtually no time.

Whether you're the CTO of a Fortune 100 company or an IT consultant working with a large company, our online backup solution for enterprises is your enterprise solution for remote data backup.

## Available wherever you are

Our service includes file synchronization and mobile access through our mobile app. How many times have you emailed a file to yourself, copied work to a USB drive to take home, or hauled away your laptop to work on files away from the office? Our file synchronization makes working from anywhere easy. Just save your most active files to the folder that's synced and they're automatically copied and updated across all of your devices and the cloud, so you can get the job done anywhere. And files stored using file synchronization or that are backed up to the cloud are available via our mobile app for your iOS or Android devices. Your files are always protected and always available to you.

### Our service backs up server-specific applications, including:

- Network shares
- All versions of SQL and Exchange
- SharePoint
- Active Directory
- Com+ services
- SYSVOL directory share
- Windows Registry database

## Cloud backup feature set

### Fast

- **Data seeding:** Move 200 GB or more to the cloud quickly with data seeding.
- **File scanning:** Back up millions of files effortlessly with advanced file scanning.
- **Block-level incremental backups:** After the initial backup, our service only backs up new or changed portions of files, saving bandwidth.

### Simple

- **Easy account management:** We manage multi-user environments easily and efficiently so you don't have to.
- **Set up user groups:** Organize users into meaningful groups by profile, space usage, feature availability, backup configuration and more for easier administration.
- **Active Directory integration:** Automatically trigger user creation, organizations and removal in our backup solution.
- **Single Sign-on:** End users log on with AD credentials.
- **Custom installations:** Choose from user-assisted, background, and silent installation options through your software management system of choice.
- **Automatic or scheduled backups:** We work with you to determine data retention policies and set the service to back up automatically or to a schedule you choose.
- **Custom configurations:** We'll help you set policies on bandwidth usage and backup speeds, create custom backup sets or define what file types should be backed up.
- **Reliable data restores:** Browse and search your backed up files, then restore file versions up to 90 days in the past in multiple ways, including the web, software client, or by ordering a DVD restore.
- **Local backup:** Windows users can back up locally to an external device as well as online for double protection.
- **Standard and customizable backup sets:** Use pre-defined backup sets of common file types, or create your own backup sets.

### Secure

- **Encryption:** All user data is encrypted locally with military-grade encryption prior to transfer. Choose a managed encryption key or a personal key for added security.
- **World-class data centers:** Data is stored in state-of-the-art data centers, which employ the highest security standards.
- **Audits and certifications:** Our service has successfully completed an SSAE 16 audit and is ISO 27001 certified.

### Scalable

- **Back up computers, servers, and NAS:** Our service backs up laptops, desktops, NAS, and mission-critical data on multiple servers including SQL, Exchange, and other file servers.
- **Open and locked file support:** Our service backs up all open and locked files (including Outlook PST files), even if the file is changing, the backup is paused, or the machine is rebooted, ensuring faster initial backup times and bandwidth efficiency.
- **Version (snapshot) support:** Restore from file versions up to 30 days in the past.
- **Mobile access:** Use our free mobile app for iOS and Android to access backup data
- **Windows and Mac support:** MozyEnterprise® supports Windows 7, 2008, Vista, XP, and 2003, 2012 (desktop/server) and Mac OS X 10.8, 10.7, 10.6, 10.5, and 10.4 (desktop/server).

### Network Usage

- **Single-instance storage:** Duplicate files across your environment are only backed up once, saving bandwidth.
- **Bandwidth throttling:** Define the amount of bandwidth used all the time or between specific intervals.
