Static Control & Cleanroom Products

S1145HG

Description

S1145HG Series is a Heel Grounding Strap that provides the end user with an effective means of charge dissipation in the static protected areas. This product is made out of a 2-layer rubber material. Inner layer is beige and insulative, and the outer layer is conductive in black color. Adjustment is made easy through an elastic material and a Quick-Release buckle. The product has a 12" long conductive tab for skin contact and a molded one mega ohm current limiting safety resistor.

Specifications

Measuring Ranges:

Color:	Beige/Black
Total Thickness:	60 mil
Beige Layer:	30 mil
Black Layer:	30 mil
Tensile Strength (ASTM-D-412)	
200%:	700 psi
At Break:	1500 psi
% Elongation:	350%
Durometer (Shore A), ASTM-D-2240):	60 mil
Conductivity (RTT), (EOS/ESD-S4)	
Beige Layer:	1X10E11 ohms
Black Layer:	8X10E4 ohms
