## *Product Specifications*

### *S4002*

### *Static Dissipative*

### *Mat, Glass & Hard Surface Cleaner*

### *Description*

Static Dissipating Mat Cleaner is specifically designed for cleaning and maintaining static dissipative matting. Regular cleaner and detergent compounds destroy the static-dissipating properties of highly specialized conductive mats, rendering static-control maintenance programs ineffective. The S4001 removes dirt and soil while maintaining or increasing static dissipative properties. This product is effective on all types of ESD control matting and hard surfaces such as work benches, storage racks, and counter tops. This product may also be diluted and used to clean computer screens, computer cases and Plexiglas surfaces. Environmentally safe, it is noncorrosive, nonflammable, and biodegradable.

## *Instructions*

For anti static matting or anti static hard surfaces, simply spray on the Cleaner and wipe with a clean low lint wiper.

For computer screens and acrylic surfaces the Cleaner should be diluted 1:4 with water. Spray on diluted the Cleaner and wipe with a clean low lint wiper.

## *Specifications*

Active Ingredients	Anti-static and quaternary compounds
Electrostatic Decay Time	0.1 Seconds
pH	6.5 - 7.5
Color	Light Green
Odor	Mild Detergent
Solubility in Water	100%
Freeze/Thaw Stability	Minimum 3 cycles
Shelf Life	1 year minimum at room temperature
Weight Per Gallon	8.3
Biodegradable	Yes
Net Contents	32 FL. OZ. (0.95 L)
Packing	12 per Case

## **Safety Information**

Health	1	Flammability	0
Reactivity	0	Personal Protection	B

**CAUTION:** May cause irritation in undiluted concentrations. If ingested, give vinegar, lemon or orange juice. Follow with olive oil. Do Not Induce Vomiting. External contact, flood with water. In the event of eye contact, wash with plenty of clean water. Contact a physician immediately. Contains Diethylene Glycol Methyl Ether #111-77-3. For complete information consult MSDS sheet.
