Service Requirements

1) General Description of winch prior to service:

2) Remove Rope/Cable, inspect general condition, comments:

3) Remove electric drive from winch. Inspect motor internals for signs of moisture and dirt, clean as appropriate with circuit cleaner. Inspect motor brushes and armature for cleanliness. Report on condition, adjustments, work completed:

4) Loosen tie rods and remove gear box from winch. Clean and grease drum internals and centre shaft. Report on condition, adjustments, work completed:

NOTE: The winch gearbox generally should not require disassembly unless winch shows signs of water and mud ingress. Disassembly of gear box should only be performed by confident persons. If gearbox is disassembled ensure care is taken to not damage or accidentally discard seals or gaskets. Winch gears should be cleaned as appropriate and re-greased with an appropriate high temperature gear grease. Report on any work completed:

5) Inspect electrical cables and report on condition including effectiveness of cable sheathing. Also report any adjustment or work completed:

6) Inspect control box general condition and cleanliness. Report on adjustments, work completed:

7) Inspect hand controller and report on general condition and function:

8) Please list any additional notes or work performed:

Notes:

Your Sherpa 4x4 winch should only be serviced by persons considered appropriate. If unsure give us a call or email.

Examples include, qualified mechanics, autoelectricians, engineers, 4x4 shops.

The winch shall be removed from vehicle prior to beginning service. Genuine Sherpa4x4 parts must be used for any spare parts that may be required during the service. Contact Sherpa 4x4 as necessary to obtain parts under warranty. Photographs of faulty parts are recommended to support warranty claims.
