STABILITY

A photograph of an office interior featuring mobile storage units. The units are light blue and have been moved to create a clear aisle. In the background, there are cubicles, a large green plant, and a round table with a blue folder. Two red 'EXIT' signs are visible on the ceiling. The overall scene is brightly lit with recessed ceiling lights.

CREATIVE STORAGE SOLUTIONS

In today's world, where square footage is a precious commodity, finding sufficient storage space is always a challenge.

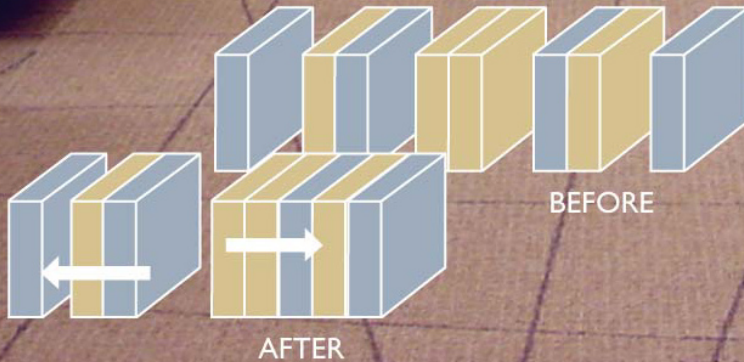

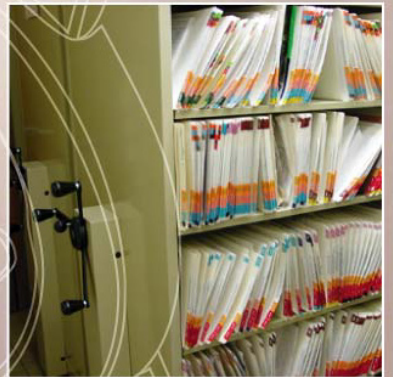

Mizer Mobile Systems is committed to providing solutions that maximize the productivity of space devoted to storage.

MIZER
MOBILE SYSTEMS

MAXIMIZE STORAGE CAPACITY

Our design is simple and sturdy, yet flexible enough to meet the ever changing demand for storage. Mizer's low profile carriage design allows for the greatest amount of storage capacity within easy reach, improving workflow, consolidating operations and accommodating growth.

INCREASE STORAGE OPTIONS

Mizer mobile systems are customized to fit your individual storage needs. We pride ourselves in developing creative and flexible solutions to meet unique storage requirements.

Our innovation in design has proved to be a functional and economical method for handling a wide variety of materials.

Mizer mobile storage systems can be used effectively in a wide variety of different situations. Our smaller lateral aluminum systems can be installed next to personal workstations, large central filing stations can support a wide variety of diverse operations, and massive steel systems are well suited for your bulk storage requirements.

BEFORE

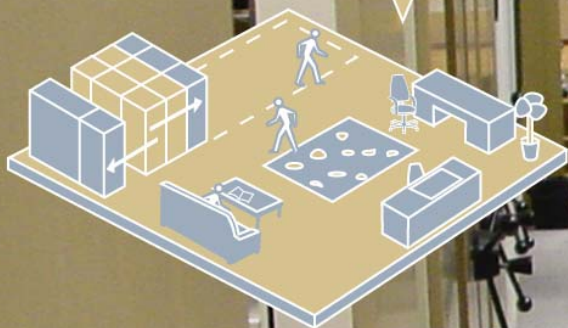

AFTER

MIZER
MOBILE SYSTEMS

Mobile shelving
can create new space
for more storage
or leave you more room
to work.

IMPROVE STORAGE POTENTIAL

Stationary shelving units may not be the best solution to your storage needs. By smoothly rolling right up against each other,

Mizer mobiles improve space management and enhance productivity by eliminating the need for space wasting aisles created by fixed shelving systems.
