Agency Certifications

USA - FCC CFR 47 Part 15, Subpart B This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
   * Reorient or relocate the receiving antenna.
   * Increase the separation between the equipment and receiver.
   * Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
   * Consult the dealer or an experienced radio/TV technician for help.
Operation with non-approved equipment is likely to result in interference to radio and TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Canada - ICES-003 This Class B digital apparatus complies with Canadian ICES-003. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Setting Up PadDock 10

Before You Begin

The first time you unpack your PadDock 10, please remove the protective covering over the bottom anti-skid pad.

Step 1: Dock iPad

Rotate PadDock 10 until the speaker is on the left and the dock connector is down. Align your iPad against the speaker with the dock connectors lining up then push down firmly.

You can also insert your iPad with the dock in the horizontal position, just be sure that the dock connectors are aligned so you do not damage your iPad or PadDock 10.
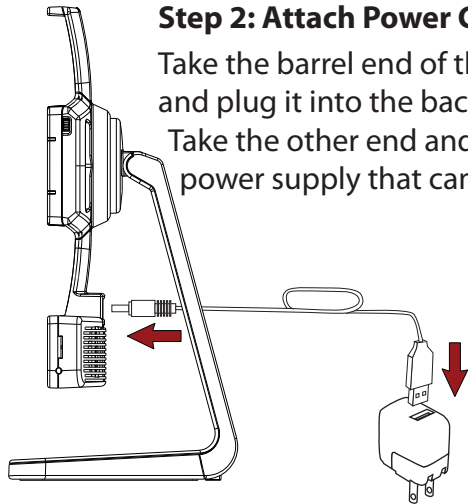

Note: If your iPad is brand new, there may be more resistance.

Step 2: Attach Power Cable

Take the barrel end of the USB to Power Cable and plug it into the back of your PadDock 10. Take the other end and plug it into the power supply that came with your iPad.
Step 3: Attach To Computer (Optional)

You have the option of attaching the PadDock 10 to your computer. The mini USB port attaches to the back of the PadDock 10. The other end of the cable attaches to an available USB port on your computer.

Step 4: Turning on

Plug your power supply into an available outlet. Switch the Charge / Sync Switch to Charge mode. You can then turn your iPad by pressing its power button or home button.

Charge / Sync Switch

Charge Indicator

Sync Indicator

Volume Knob

Controlling the PadDock 10

Listen

The volume control knob on the side of PadDock 10 controls the sound level of the speaker system. The sound can be turned off completely by rotating the volume knob counterclockwise until it clicks.

The system can simultaneously play music and charge the iPad. When playing music, the charging rate is reduced. The speaker connot play music when syncing with iTunes®.

Switching Between Charge and Sync Mode

Charge Mode

When the Charge / Sync Switch is in the up position the system is set into charge and play mode. When set in this mode, the Charge Indicator should light. If the Charge Indicator is not lighting, please check the USB to power cable.

PadDock 10 should be in Charge mode anytime you are not planning to actively sync with iTunes. The iPad charges at its highest rate when the speaker is turned completely off.

Sync Mode

When the Charge / Sync Switch is in the down position the system is set into Sync mode. When set in this mode, the Sync Indicator should light. If the Sync Indicator is not lighting, please check the USB to mini USB cable to ensure it is attached correctly.

When set to Sync mode, the indicator in the upper right hand corner of your iPad will indicate Not Charging. The USB cable provides some power to the iPad to prevent the battery from draining during syncing. If not switched back to Charge Mode, once the iPad goes to sleep, it will charge very slowly at a rate equivalent to plugging directly into your computer.

Please review your iPad documentation for more information about syncing music, videos, pictures, book and apps to your iPad.

Adjusting the PadDock 10

Rotate

With stops every 90 degrees, PadDock 10 allows you to choose the best setting for your app or web page. Please note, care should be taken to avoid tangling the cables.

Tilt

Tilt your iPad by grasping the stand on both side and tilting to the desired viewing angle.
