

APTUS CASE CHARGER
Innovation for Smart Phone
User Manual Rev 1.0

Welcome

Thank you for purchasing the APTUS CHARGER CASE IP5.
You will now be able to travel anywhere any time without worrying about your smart phone running out of juice. You are truly master of your own destiny, no longer bound by the limitations of your iPhone's internal battery or corded charger.

With a built in 4200mAH battery and folded AC Blades you can charger your phone over 175% and charge it with any input in the world from 90V AC to 264AC. You are now living a cord free life, real mobile life style.

Package Contains

- Instruction Manual
- APUTS Charger CASE
- Pass-through Headphone Adapter (optional, special orders)

Features:

The APTUS POWER CASE extends the battery life of your iPhone for hours with up to 175% . It means you can charge your phone ONE time and charger 75% for second time. It provides you more power to rock, talk, surf, chat and provides a comfortable ergonomic design with the complete protection of a hard shell case.

With the built on fast charge technology you can charger your Case battery and IPhon5 battery much faster vs. the standard corded charger. Usually it takes about 40% less time vs. the standard corded charger to charger the same amount of charge. This is accomplish by charging both case battery and the iPhone internal battery in parallel.

Here's why APTUS POWER CASE such a fantastic product:

1. (Take a breath) Ergonomic, form-fitting, fully protective ultra-impact-resistant case with stand-and battery-and charger all in one in a smooth case.
2. An integrated power push button switch allows you to Charge (blue) whenever you need it. However, in standby mode (switch off), you still have the full protection of a case.
3. A USB port on the side of the case allows you to charge other devices besides your iPhone when the case is connected to the AC input or case is unplugged.
4. Sync wirelessly when your iPhone and computer are on the same Wi-Fi network just by flipping the Aptus Case to charging mode.
5. Included pass-through headphone adapter allows you to use any style headphones while your iPhone is in the APTUS CHARGER CASE.
6. Track battery power at a glance with an integrated four-light LED indicator. You can keep tabs on charging status and current battery life. It shows the four power levels from 25%, 50%, 75% and 100%. Know your charge level before you go!
7. The Case included an iPhone charger input which allows you to charge your phone while refilling your Aptus Case at the same time. Really, you'll never need to remove the Aptus case from your phone. The fast charge technology allows you to charge
8. Rechargeable for over 500 full cycles. Our case is built to last, letting you do more, longer. If you change your iPhone battery more often
9. Smart battery technology actually instructs the iPhone to drain power out the APTUS CASE first. When you're done with the APTUC CASE, you can still have a fully charged iPhone. We would recommend to always charge the APTUS CASE and your phone on every opportunity with the built in AC case. It will help improve your battery life beyond 500 cycles.
10. The APTUC CASE offers complete protection from top to bottom. No more choosing between
Protection, power or charging.
11. Built-in short circuit, over-charge, and temperature protection letting you charge with Confidence. Safety First!
12. Built in Stand in the back of the Case. This can used to listen to music or watch video without carrying the case

Compatibility

The APTUS CASE was designed and intended solely for the Apple iPhone 5/5C/5S. Please do not attempt to use the product with any other device.

Important

The APTUS CASE comes charged and ready to go, but after the initial use, normal charging will take about 8 to 9 hours for maximum power with 4200mAH. It will charge the 4200mAH battery and your iPhone5 battery. (* iPhone5 battery should not be in a bad condition. You can charge it by itself or while the iPhone is inserted.

Charging your APTUS CASE:

There are two ways you can charge the APTUS CASE.

- 1) You open the folded AC blade and plug it into the AC wall. This is a preferred method. The Case is design to work from 90V to 264VAC so you can plug your AC blades input anywhere in the world. Keep in mind the AC blades are design to operate on the North American input. You have to use the external matching connector for another county's outlet.
- 2) Connect the **Power Charging cable** provided to the bottom of your APTUS CAE. (* There are many different cable available with minor dimension differences, not all of them will work with the Aptus case). The USB side of Power charging cable can be plugged in to the AC Charger, computer or any power source with a USB out, like the standard USB wall adaptor included with your phone. The LEDs located on the front of the device will blink to indicate the APTUS CASE has begun charging. When the LEDs stop blinking, it does not mean the case has stopped charging. You can check the charging status by pushing the status button next to the LED lights; APTUS CASE is fully charged when all four LEDs light up. You can read clearly the marking of 25%, 50%, 75% and 100% on the LED panel.

Charging your iPhone 5 using the APTUS CASE:

If your iPhone is drained of power or if you want to extend the battery life of your phone, slide the iPhone into the APTUS CASE.

Make sure that the connector is securely inserted into the bottom of the iPhone and the power switch is turned "On,". When your phone recognizes the APTUS CASE, a battery symbol will appear on the screen. We have not get the approval for MFi (Made for Apple) so the screen will indicate that this accessory is not compatible with this phone. But ignore this sign and as long as the battery sign appear on the screen, it means the phone is charging and/or using the power from the APTUS CASE rather than from the phone itself.

If your iPhone is drained of power, the APTUS CASE will immediately begin charging your phone when power switch is “On”. If your iPhone is fully charged, the Aptus Case will act as your primary battery and no power will be lost from the iPhone internal battery until the Aptus Case is depleted.

Charging Your PAD OR OTHER SMART PHONE WITH APTUS CASE:

If you need to charge any other device with battery, APTUC case can provides an additional USB output on the side. You can charge your unit when the case is plugged into the AC wall with a USB cable. Additional device can also be charged when the Aptus case is charging with an external charger. You can charge the

Checking the status of the APTUS CASE:

To check the battery status of the Aptus Case, press the power button located on the back of the device. When pressed, the LED lights will illuminate for several seconds. Four LEDs means that the Aptus Case is fully charged. One LED means that it is almost empty. Know before you go.

Switching your APTUS CASE to standby mode:

The power switch on the front of the APTUS CASE allows you to choose between standby mode and charging mode.

To use your phone’s internal battery, push the switch to the “OFF” mode. When your internal battery is low, press the power switch "On" and your iPhone will begin charging immediately.

*Note: Using the standby mode will give you even more total battery life. The iPhone uses additional power to be on a constant charge. Charging when your battery is low will let you get the most power of out the Aptus Case.

To keep your APTUS CASE operating to its fullest potential, we recommend the following:

1. Keep your APTUS CASE dry and away from moisture and corrosive materials.
2. Do not wash the Aptus Case with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.
3. Recharge your Aptus Case once every three months when not in use. Charge it for one hour before if you plan on putting it away.

Warranty

At APTUS, we are dedicated to making the best quality products we can. To back this up, your APTUUS case is warranted for 1 full year from the date of purchase.

This warranty does not affect any statutory rights that you may be entitled to. Keep a copy of your purchase receipt as proof of purchase. Be sure to register your product at APTUSCASE.COM to activate.

Failure to register your product and/or provide proof of purchase may void the warranty.

Warning

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you (“Purchaser”), and not APTUS POWER INC (“Manufacturer”) are responsible.

- Don’t put your finger behind the case when you plug or pull the unit from the AC wall plug.
- Do not store battery in high temperature environment, including intense sunlight heat.
- Do not place battery in fire or other excessively hot environments.
- Be cautious of excessive drops, bumps, abrasions, or other impacts to this battery.
- If there is any damage to the battery such as dents, punctures, tears, deformities, or corrosion due to any cause, discontinue use.
- Contact manufacturer or dispose of it in an appropriate manner at your local battery recycling center.
- Do not disassemble this battery or attempt to re-purpose or modify it in any manner.
- Do not expose this battery to moisture or submerge it in liquid. Keep battery dry at all times.
- Do not attempt to charge battery using any method, apparatus, or connection other than the device’s USB connector. For questions or instructions for the various ways to charge the Aptus Case refer to this manual’s “Charging your iPhone 5 using the Aptus Case” section.
- Do not attempt to replace any part of this battery.
- If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.
- All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abraded, cut, or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.
- For extended storage, first charge your battery for three hours.
- Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

Legal

This battery is meant for use only in conjunction with the appropriate mobile device. Please consult your device packaging to determine whether this battery is compatible with your particular mobile device. Manufacturer is not responsible for any damages to any mobile device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this battery in conjunction with any device or accessory other than the appropriate mobile device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this battery as outlined above. If you are responsible for battery use with an unintended mobile device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third party or parties.

grounded. Operation with noncertified peripherals or non-shielded cables may result in interference to radio or reception.

MODIFICATION: Any changes or modifications of this device could void the warranty.

FAQ

How does it work?

The APTUC CASE has a rechargeable lithium polymer battery inside. When you slide your phone into the case, a connector at the base plugs into the port at the bottom of phone. Press the power switch on the front case to green to start charging your phone. After using up all the power in the Aptus Case, just recharge it with the included micro USB cable for more on-the-go power. It's as easy as that.

Why aren't the LEDs blinking while the Aptus Case is charging?

After connecting to a power source, the LED status indicator will start blinking to indicate charging. The lights will turn off after 30 seconds allowing for a good night's rest. Remember to check the status indicator before you disconnect. When all four LEDs are lit, your Aptus Case is fully charged.

What is the best method for charging my iPhone using the APTUS CASE?

Assuming the iPhone and Aptus Case are both fully charged, we recommend waiting until your iPhone has 40% battery left. When you're in the red, press the power switch and let the APTUS CASE to do the heavy lifting.

The iPhone requires more power to charge past 80%, so if you want to get the greatest battery boost from the Aptus Case, we suggest flipping back to standby mode until your phone battery is low again. This isn't the end-all-be-all, but we like it.

What is best method for charging my APTUS CASE?

Connect the Aptus Case to a power source using the foldable AC Blade on the back of the case. You can also connect any "lighting" cable that came with your iPhone. The cable can be plugged in to your computer or any power source with a USB out. You do not need to remove your iPhone from the APTUS CASE to charge. Leaving the Aptus Case on your phone while charging will actually charge both the case and your iPhone simultaneously!

How many charge cycles do you get out of the Aptus Case? Or, in other words, how long will the Aptus Case last?

The APTUS CASE is rechargeable for over 500 full cycles. A full cycle is when the case is charged from 0% to 100%. Partial cycles, like charging from 25% to 100%, will not count as a full cycle until all of the partials equal 100%. After 500 cycles, the battery in the Aptus Case may

provide less than 75% of the original capacity. This is normal for any product with a lithium polymer or lithium Ion battery.

What are the benefits of switching the Aptus Case to standby mode?

Using the standby switch will give you the biggest battery boost from the Aptus Case. The iPhone uses additional power to be on a constant charge, so charging when your phone battery is low will let you get the most from your Aptus Case.

Can I sync my iPhone while the Aptus Case is still attached?

Yep. You can sync wirelessly if your iPhone and laptop are connected to the same Wi-Fi network. Just turn “On” powered Aptus Case to charging mode or connect to any USB power source.

What is APTUS’s return policy?

APTUS reserves the right to claim a 30% restocking fee upon return. Visit APTUSCASE.COM or Aptuscase.com for a full “Return Policy.”

Will I always receive 175% extra the battery life with my APTUS CASE?

We cannot guarantee that you will receive a 175% battery boost. The amount of additional battery you will receive depends on a variety of factors that are different for every user.

Does the APTUS CASSE block the speaker, microphone, camera, or any other ports?

Of course not. It enhance the sound.

Does the Aptus Case interfere with antenna reception or Bluetooth connection?

Not a chance.
