Plaxton Elite – National Express

Space is an ever-increasing problem for collectors, so N Gauge modelling is proving to be very popular for this reason. This newly tooled modern coach embodies two famous names in the industry. Plaxton is synonymous with bus and coach building since the company was founded in 1907 by Frederick William Plaxton. They still operate from their Eastfield Works on the Seamer Road, in Scarborough where they remained a family firm until being bought by Alexander Dennis in 2007. National Express, the nationwide UK transport company, found its roots as a brand in 1972, bringing together many independent travel providers under the National

Express name, since when they have acquired numerous transport companies including bus, coach, rail and tram services. Today, National Express operates not only through the UK but also overseas, where its operations extend as far as the USA and Canada.

The Elite is Plaxton's flagship coach, decorated in the signature red, white and blue National Express livery, operated by Selwyns Travel Ltd, Runcorn, Cheshire.

Look out for YN10 FKV on the No. 505 service to London. You may have even travelled on it!

Alexander Bluebird Burlingham Sunsaloon

This is true nostalgia! HV Burlingham was a coach building business based appropriately in Blackpool in the heyday of luxury saloon coach travel. The latest Oxford N scale release of the full-fronted, vertical-engined coach comes in the Alexander Bluebird livery. This coach has not been modelled before at any scale.

Burrell Showmans Locomotive – Anderton & Rowland 'Earl Beatty'

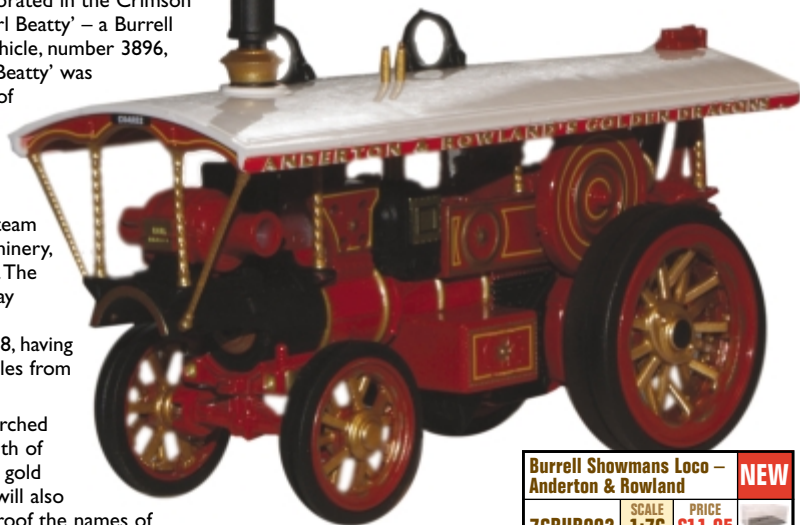

The name of Anderton & Rowland is one of the most famous names in the history of UK Fairground Showmen. With roots in the West Country, the company had a number of Burrell steam vehicles over the years, all highly decorated in the Crimson and Gold livery, including 'Earl Beatty' – a Burrell 8 NHP Showman's Scenic vehicle, number 3896, Registration CO4052. 'Earl Beatty' was delivered to George DeVey of Anderton & Rowland in May 1921.

The manufacturers Charles Burrell and Sons of Thetford were well known for their steam engines and agricultural machinery, exporting all over the world. The company, which had its heyday towards the end of the 19th Century, finally closed in 1928, having made over 5000 steam vehicles from their Norfolk base.

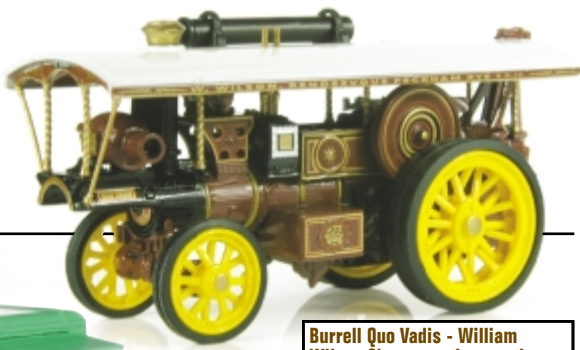

The colourful and well-researched Oxford model carries a wealth of detail, right down to the fine gold coachlines throughout. You will also notice along the side of the roof the names of two of the rides for which 'Earl Beatty' was used primarily – one on each side. One of the tasks was to erect and power the scenic railway ride 'The Golden Dragons' as well as being used as the power horse for the Jungle Speedway ride. After a long career, 'Earl Beatty' passed through several purchasers before being acquired by current owners Robert Coles and family, who have restored the steam engine to its original former glory.

Jaguar XJS – Signal Red

More new tooling adds the luxurious Jaguar XJS to your Oxford line-up of prestigious motors before the end of the year.

The Jaguar XJ-S, which became known as the XJS in the 1990s, was classed as a luxury grand tourer, made by the upmarket Jaguar Company between 1975 and 1996. The 2-door coupe was manufactured at the firm's Coventry works, where over 115,000 came off the production line before it was superseded by the XJ8 in 1996.

With a top speed of 143 mph when it was first introduced, it became a favourite drive for motorsport enthusiasts, particularly in the 1980s – and it still enjoys popularity in the sport today through Jaguar Clubs.

Jaguar XJS - Signal Red			NEW
76XJS001	SCALE 1:76	PRICE £3.95	

Our model, H755YYN as produced in 1990, features a high level of detail with lots of chrome work to the exhausts, door handles, window surrounds and the front grille, emulating the real thing. The body comes in bright Signal Red, a favourite colour of Jaguar owner/ drivers of the era.

VW Bay Window Van - BRS Rental

In the 1940's the Road Haulage Executive, trading as British Road Services (BRS), was created as part of a remarkable plan to nationalise transport across the UK. BRS began to generate its own business as the state run transport system was beginning to suffer. By the 1970's BRS Truck Rental was launched. The fleet of vehicles, with their distinctive red & blue arrowhead logo as featured on this VW van, were soon a common sight across the British road network.

OXFORD N SCALE

Corporation of London Scammell Dustcart

You may have seen these models before in 1:76 scale but now here they are in N Scale. After the end of the Second World War, Scammell Lorries looked at the Mechanical Horse, which was basically unchanged from its 1934 design, realised that something more modern was called for and set about re-designing the vehicle. Later Scammell offered diesel engines. These were the Perkins 4-199 for 3-ton and P4 and P4203 for six ton. The low mounting of the engine and other design changes made the Scarab more stable and its rounded all steel cab was more comfortable for drivers. The Scarab lasted in production until 1967.

Bedford OB Coach – Wallace Arnold

Wallace Arnold was founded in 1912 by Mr Wallace Cunningham and Mr Arnold Crowe. Until its merger in 2005 with Shearings, the company was one of the most famous and prolific coach operators in the UK, being seen at many a seaside resort during the summer months, especially on the North East Coast of England, from its base in Leeds. Following the merger, the new company became known as W A Shearings but two years later WA was dropped to merely Shearings Holidays.

DAF 105 D-TEC CombiTrailer - Deben Transport

Oxford's use of the versatile DAF 105 tractor unit with various trailer options now comes with the brand new D-TEC CombiTrailer - the first off the new tool - and replicating in perfect miniature an equally new format in transport trailers, bringing Modern Truck collections right up to date.

D-TEC is a Dutch manufacturer of logistics vehicles, who have adopted a scientific and extremely practical approach with the development of their patented Combi Trailer. The specially designed 20 ft trailers enable the handlers to simultaneously load and unload two 20 ft containers at loading bays.

Deben Transport is an independent haulage company formed in 1987, which specialises in container transport from three centres around Felixstowe, Southampton and Hull Docks.

PLEASE NOTE: Our D-TEC trailer doesn't come with containers as there are plenty available from various railway manufacturers. The trailer is suitable for carrying 20ft, 40ft and 45ft containers.

DAF 105 (SC) Curtainside - A F Davison

The Oxford replica of the A F Davison DAF truck faithfully represents one of the company's general haulage vehicles, as used currently. Carrying the registration RIB 5088, our model appears in the company's distinctive two-tone pale blue and navy colour scheme. Just like the real thing, the detailed emphasis is very much contained on the tractor unit. Given the popularity of Irish liveries, this is a real contemporary gem to add to your fleet.

British Rail Land Rover 88" Fire Tender

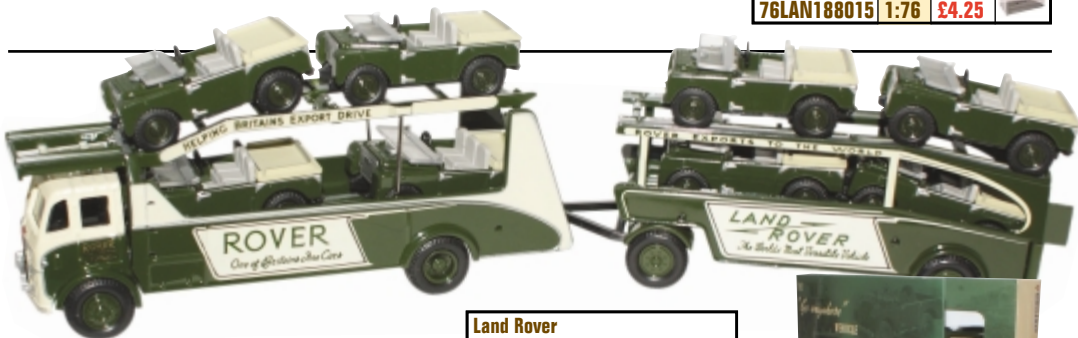

Land Rover Fire Engines were built on 80-inch and 88-inch chassis. These small and easily manoeuvrable fire tenders were capable of operating in restricted spaces that larger appliances could not reach. Many were sold to works fire services or small airfields when they filled the role of first-response vehicles. Although Land Rover sub-contracted the construction of later Fire Engines to specialist manufacturers through their Special Projects Department, the Series I models were actually built at the Rover factory.

The 76LAN188015 is a new release and follows the same design as the 1:43rd version released last year. The series I was ideal for use around railway stations and was a common sight in the 1950's.

Leyland Car Transporter – Rover

Land Rover commissioned a fleet of specially built Leyland Transporters, designed so the Land Rovers could be delivered with their windcreens folded flat on the bonnet and the hoops and canvas folded onto the rear body. This set comes with both Front and Rear trailers along with 8 Land Rovers, (model 76LAN180005) in order to create more realism. You can see from the picture how the Land Rovers were loaded on to the rear trailer, up over the cab. True to the original, the top deck of the main unit can be posed in two positions. In Special packaging, opening the flap reveals the Transporters and Land Rovers.
