

VK253 Protective Tape

Description

A low tack polyolefins coex surface protection film coated with an emulsion acrylic adhesive system. Good resistance to moisture, U/V and variable climatic conditions.

Applications

- Mirror finish steels (where bending or cutting is required).
- Medium gloss paint finishes.
- Anodised aluminium laminates (speaker cabinets e.t.c)
- Glass (Temporary dust barrier and scratch protection)

Technical Details

Total Thickness	0.032mm
Backing Thickness	0.030mm
Tensile Strength length	40 N/mm ²
Tensile Transverse	27 N/mm ²
Steel Adhesion	165g/25mm
Dielectric Strength	-
Colours	Blue and Clear

Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
