

The invisible threat to heart health Part 1

Heart disease is the number one cause of death. There's no shortage of efforts to raise awareness; May is High Blood Pressure Education Month and Stroke Awareness Month.

But despite all the publicity, heart disease is often a silent killer. Many people don't know they are at risk or that they have the early warning signs.

And as we cover in the first part of an extended interview with Warren Matthews, even being a health expert doesn't guarantee you won't be affected by heart disease.

The Warren Matthews story

Warren Matthews, founder of Xtend-Life, went from being an incredibly healthy 70 year old to lying flat on his back in the ICU.

As he tells in this interview, in spite of his health expertise, Warren was caught out by the invisible build-up of serious calcification.

I love this product and ordered another bottle for my husband, so we'll both be taking it. I can tell a significant difference in my health. I have tons more energy with the ability to exercise as I've never had before without being winded. I have moderate aorta regurgitation but I believe this product is helping with my condition. I honestly believe it is! Thank you!

Jane Q, USA

If you research all 8 ingredients in CX8 you will understand how amazing this product is. I'm 46 years old and I want to do everything I can to naturally maintain my heart health. I'm very picky about what I put into my body, so I did a ton of research on this product and Xtend-Life. I'm extremely impressed with the quality of the ingredients and the commitment this company has to providing world-class products. There is not another formula like this on the market.
