

## HEATING INSTRUCTIONS: CALLIE'S BISCUITS

### STEP ONE

Keep biscuits frozen until use. Preheat the oven to 400° F.

### STEP TWO

Remove biscuits from plastic wrap. Wrap biscuits completely in aluminum foil.

### STEP THREE

Bake in oven for 25-30 minutes – oven times may vary.

### STEP FOUR

Open the foil for the last 3-5 minutes of baking so that the biscuit tops become crispy and golden brown.

### STEP FIVE

Cool biscuits slightly before separating.

### STEP SIX

Enjoy, but don't forget to butter your biscuit! No, we are not kidding – one pat of butter per biscuit (for biscuits without filling)!
