

# PREDATOR High Speed Rugged PTZ Camera

Rugged... with *Style!!*

360 Vision Technology are market leaders in advanced CCTV dome camera technology and control, engineering and manufacturing high quality, visionary security products and solutions for over 20 years

**PREDATOR** is a truly rugged, high-speed motorized PTZ (Pan Tilt and Zoom) camera, engineered and field proven to perform the harshest environments and most demanding applications.

**PREDATOR** features at a glance:

Tough 6mm Cast Aluminum or Stainless Steel Housing | Vandal Attack Protection | Vibration Resistant | IP68/IK10 Certified Protection against Water & Dust | Operating Temperature Rating -40C to +60C | 180° vertical tilt giving the ability to 'look down' and fully upwards.

**PREDATOR** cameras are available with a variety of camera/control combinations, including analogue, 1080P High-Definition, with Infrared, White Light and Thermal illumination for utmost flexibility and performance.

On-Board "intelligent" illumination ensures that reflective materials do not glare the video and obscure the image. Variants include up to 500m+ Long Range Infra Red and combined Dual IR with White Light for sharp, "Colour At Night" video images at distances of up to 250m.

**PREDATOR HD30** offers 30x zoom lens with HD 1080P ultra-low light image sensor for offering an amazing image quality even in extreme low-light conditions. (Min. Sensitivity: 0.0013 lux Colour/0.0008 lux B&W with no illumination)

**PREDATOR HD HYBRID** can provide dual HD IP stream and analogue video outputs straight from the camera (no decoder needed!) plus simultaneous analogue or IP PTZ camera control.

**PREDATOR HD+THERMAL** dual output HD + thermal with lens option up to 100mm for long range image detection in zero light applications.

**PREDATOR STEEL HYBRID** adds an anti corrosive, extra strength 316L stainless steel housing designed for the toughest environments such as petrochemical and maritime ports.

**PREDATOR HD+RADAR** advanced threat detection system combines ground-surveillance radar technology with HD PTZ camera to detect humans and vehicles at a distance of up to 200m and to automatically point the camera at any intruder.
