15 1/2		24.2	76.1
15 3/4		24.4	76.7
16		24.6	77.4

Use this chart to convert a ring size, or to confirm that a sizing system uses the same measurements.

Our rings are made with the inner circumferences listed here, corresponding to ring size.

Each ring is made to order in the size and width that you request.

Our suggestions for accurate sizing:

First determine the width of band you prefer, then try on rings of that width to determine your size.

Width is a personal preference, and your size should correspond to the width that you like best.

Width can affect size on most fingers, so do not assume you know your ring size based on another ring that you wear.

Keep in mind that many fingers expand and contract depending on the time of year and climate.
