

Position: Production Chemical Operator

Location: 921 Central Ave W, Springfield TN 37172

Company: Stony Creek Colors, a chemical manufacturer based in Springfield, TN, manufactures bio-based textile dyes that improve profitability and sustainability for farmers, while empowering our customers – fashion brands and textile mills – with greater transparency. Stony Creek Colors develops and manages agricultural supply chains based on new, specialty crops like indigo to replace imported, petroleum-based synthetic textile dyes with reliable, consistent, and farmer-grown colorants.

Job Description: The mission of the Production Chemical Operator is to process bio-based materials in conversion to colorants and dyes. The Production Chemical Operator shall operate production equipment in accordance with company standards and assist in general chemical operations. The individual must be flexible to work extended hours during the primary harvest season.

Stony Creek Colors believes in providing a safe and healthy work environment. As such, the Production Chemical Operator is expected to perform his/her role with safety as a pre-requisite, sharing in the values of the company specific to environmental responsibility and recognizing the commitment required to ensure these goals are met.

Responsibilities:

- Safely operate production equipment in accordance with company procedures
- Monitor equipment and assigned processes for performance and consistency
- Perform standard material handling functions
- Monitor operated equipment and identify potential maintenance needs for same
- Maintain accurate and legible processing notes via process run cards
- Provide necessary input to enable process improvements
- During the off-season, perform winter production runs, assist with factory and process expansions, perform equipment seasonal maintenance and other tasks, as required

Requirements:

- High school diploma or equivalent
- 3+ years of continuous work experience and a verifiable work history
- Ability to stand for extended periods of time and lift 40 pounds

Preferred:

- Associates degree or a minimum of 2 years vocational training specific to industrial operations or maintenance
- Experience working in a manufacturing plant environment
- Familiarity with basic manufacturing equipment including tanks, pumps, vessels and mixers
- Experience working with agriculture related processes and equipment
- Experience performing successfully in a team environment
