

Setting up inventory with your Cowconnect system

ATTENTION: If you're already connected with a system like DMS or Växa please contact us

Step 1

Go to <https://portal.cowconnect.net> in your browser (preferably Google Chrome)
Press the login in the top right corner of the window

Step 2

Type in your username (Email)
Type in password provided in your welcome letter

Use a local account to log in.

Email

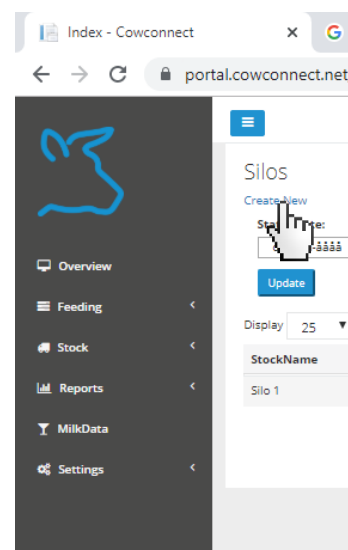

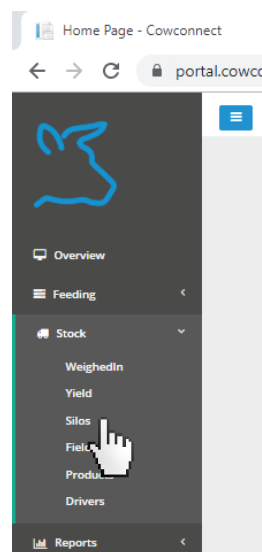

Password

[Forgot your password?](#)

Step 3

Go to Stock and select "Silo"
In the top left corner of the Silo Menu, press "Create New"
Name the Silo and press Create

Optional:

Create your **Products** and your **Fields** if you wish to track your consumption to different products of same type and your own created feedstuff materials to certain fields.

Step 4

Adding or retracting from Storage Manually

Simple way:

Go to Stock → Silo → Edit

Here you can create new event. You can either add by typing in a positive amount or retract by typing a negative. (always in whole kilos).

A screenshot of a web form titled 'Create' for 'WeighedIn'. It contains three input fields: 'Stock' with a dropdown menu showing 'Silo 1', 'Net' with the value '100', and 'Date' with the value '04-11-2019'. There is a blue 'Save' button and a 'Back to List' link below the form.

Advanced way:

Go to Weigh Stock → WeighedIn → Create New

Stock needs to be set to the Silo/storage it is to be weighed into

If you chose the option of creating products or fields earlier, you can choose these here.

If you have a tara weight you can add that along with Gross and Net value, or you can just add in the value in Net that needs to be added to the Silo/storage. Press Save when done.

A screenshot of a web browser showing the 'Create' form for 'WeighedIn' on the portal.cowconnect.net. The browser address bar shows 'portal.cowconnect.net/WeighedInEntities/Create'. On the left is a dark sidebar menu with icons for Overview, Feeding, Stock, Reports, MilkData, and Settings. The main form has fields for Stock (Silo 1), Field, Customer, Product, Tara (0), Gross (0), Net (0), and Date (04-11-2019). A blue 'Save' button and a 'Back to List' link are at the bottom.

Step 5

Setting up feedstuff to automatically withdraw from Storage
Go to Feeding → Feedstuff → Edit
Under Stock choose your Silo or storage created earlier and Save

Edit FeedStuff

Name: Silage

Customer: [dropdown]

Type: Roughage

Stock: [dropdown menu with 'Silo 1' selected]

Drymatter: [input field]

Cents per kg: [input field]

[Save]

[Back to List](#)

Each time the feedstuff paired with the Silo/storage is used, a withdrawal is automatically made.

You can see the current status of a Silo under

Stock → Silo

Alternatively you can see the stock on the Overview page

Silos

Create New: [input field] [Update]

Display: 25 records per page

StockName	Actual	Days left	
Silo 1	100 Tons	-	[Edit] [Delete]

[Previous] [Next]

From APP

It is also possible to adjust Silo's from the terminal application

From the app choose Stock → Register
Adjust the Stock to the Silo your adding or retracting to/from
and set in your weight and press Save
