DIMENSIONS

Panel Size:
2400mm (H) x 168mm (W) x 18mm (D)

Slats:
27mm (W) x 13mm (D)

(*Three panels per pack overlap seamlessly together. When interlocked the full width is 486mm)

486mm*

2400mm

PREPARATION

Ensure your wall is clean and remove any screws, nails or other fixings.

CUTTING

- Measure and mark your cut line using a pencil and square edge.
- Cut the panels with the panel face positioned upwards.
- We recommend using a fine-toothed wood saw to prevent splintering.

We do not recommend using a circular saw or jigsaw to cut your panels.

End Cap - Tongue

End Cap - Groove

FIXTURES

Mount fixtures, including mirrors, through the panels by using the appropriate wall plugs and screws.

END CAPS AND EDGE TRIM

Each panel slots seamlessly together. Add a Tongue or Groove End Cap* to finish any exposed edges. For a half height effect, use an Individual Slat* as the top trim to complete your project.

(*Tongue and Groove End Caps and Individual Slats sold separately)

INSTALLATION

Install by applying grab adhesive onto the back of your panel. Top tip: we recommend using grab adhesive to help you achieve a flawless finish.
