THE PURL SCOUT SASH

NOTES

CONSTRUCTION

This sash is knit in the round as a long closed tube with tapered ends. Once knitting is complete, the angled ends of the tube are sewn together to create a closed loop.

SIZING

This sash can easily be adjusted to fit any size! To get an idea of what length is best for you, I recommend measuring from the top of your shoulder to your opposite hip. Double this number to get the length for the main body of the sash. Then add 14"/35.5cm to account for the angled ends.

This will give you a ballpark length to aim for, but it's definitely best to check your sizing as you go by trying it on!
